Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

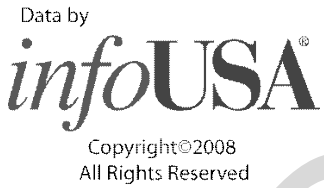

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/19/2019 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/29/2019 has revealed that there are 26 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 12 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 2 CA UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 07/29/2019 has revealed that there are 4 CA VCP sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that

there are 51 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there are 2 CA HAZNET sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 37 CA HIST CORTESE sites within approximately 0.5 miles of the target property.

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CA CERS list, as provided by EDR, and dated 08/14/2019 has revealed that there are 2 CA CERS sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

CA RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the CA RGA LUST list, as provided by EDR, has revealed that there is 1 CA RGA LUST site within approximately 0.001 miles of the target property.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-03-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Routine HMBP, HW, and Storm water facility compliance inspection. The 2016 CERS submittal was done on 1/29/16. Please note the 2017 CERS submittal is due by March 1, 2017. It was noted during the inspection currently there are no painters employed so the amount of hazardous waste generated is significantly reduced. The Hazardous waste accumulation was properly labeled and the drums were sealed. A picture was taken of the drum waste accumulation area. Hazardous waste disposal records were available for review and three years of disposal records were present. Secondary containment of hazardous waste drummed was dry and clean. Emergency eye wash stations were present, several, but one was not inspected within 2 months as noted on the monthly inspection check- violation noted. The building property owner was notified of the business implementing an HMBP. Business recent downsized by approx 50%.

Eval Notes:	Paint room - Met with Jose Manuel Ryuon. Observed a red pail in cabinet with liquid. The pail is unlabeled and does not have a lid. Jose indicates this is used thinner. He states that in order to clean out the gun, he runs thinner through the gun and collects it in the pail. The used thinner is eventually transferred to the 55 gallon waste paint drum, per Jose, but usually not immediately. The used thinner was transferred to the 55 gallon drum at the time of inspection. The accumulation start date on the waste paint drum is noted as 3/28/13 and the drum appears to be 1/4 full. Jose indicates he cleans the gun at least once every 1-2 weeks. Soiled rags are placed in two bags and put in the garbage. The rags contained in the can appear to be soiled with paint and smell of thinner. Jose indicates he launders his uniform at home. According to Jose, the paint booth filters are changed out every 1-2 weeks. The filters are placed in a drum labeled as hazardous waste. The [Truncated]

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Hazardous Waste Generator

Violations:
Site ID: 436359
Site Name: Melissa MacDonald Metal work inc
Violation Date: 03-07-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 04/06/2018. Facility stores above threshold quantities of compressed gases - ArCO2, Ar, CO2. CERS HMBP required within 30 days.. 3/12/2018 - Spoke with Melissa on the phone. She may be able to reduce to under threshold. DA 4/6/2018 CERS submittal received - HW only generator 1/2 to 1 gallon/year-cutting fluid with metals. The submittal is satisfactory, however, we are working on a technical issue of the name of the business showing in CERS. RTC received. The reduction in inventory was not observed at this time. DA 4/9/2018 - Gave until May 7th to reduce to below threshold gases. DA

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID:	412048
Site Name:	lee miltier
Violation Date:	10-24-2016
Citation:	HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description:	Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 12/02/2016. Facility failed to establish required hazardous materials business plan. The facility exceed the specified thresholds of hazardous materials required to submit a hazardous materials business plan (HMBP) in accordance with BMC 15.12.050. Therefore the facility meet the requirement to report hazardous materials and submit HMBP. Corrective Action: Please establish HMBP by November 24, 2016. To complete HMBP go to cers.calepa.ca.gov and create an account. Please report a complete list of hazardous materials inventory, site map, emergency response plan, and employee training plan.

Environmental Interest/Information System
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Potential Media Affect: Soil
Potential Contaminants of Concern: Gasoline
Site History: The subject property (Site) is a commercially-zoned parcel situate in an area of longstanding commercial and industrial activity on Fourth Street, within West Berkeley, California. A large industrial warehouse resides on the Site, with access from Fourth Street. Neighboring warehouses abut the Site and buildings such as a wine distributor and a specialized commercial coating company to the north. Various industrial metals businesses have used the Site including metal fabricators, machine shops, foundries, laboratories and paint manufacturing. Other previous business have included pesticide companies who used thinners (solvents) with their pesticide mixes. These solvents included Pentachlorophenol (PCP) mixed with kerosene (a petroleum distillate) and diesel fuel. Use of heavy metals, hydrocarbon fuels, oils, lubricant, degreasers, cutting fluids, solvents, acids, bases, and dyes / paint intermediates were found at previous on-Site business operations. Known and documented releases of these and other hydrocarbon compounds have been

DRAFT

PEERLESS LIGHTING (Continued) **S100226159**

documented from the Site. Local soil and groundwater on Site has been impacted from vertical and lateral migration of these hydrocarbon and related contaminants. detected concentrations of hydrocarbons include total petroleum hydrocarbons as diesel (TPHd) up to 39,000 ug/L in groundwater (Environmental Screening Levels for TPHd in groundwater are 200 ug/L). PCP was identified up to 460 mg/kg in on-Site soil samples. TPH as kerosene (jet fuel) was found up to 6,000 mg/kg in soil and TPH up to 10,000 mg/kg in soil.

Background Info:	A succession of pesticide companies including, Able Termite Control Company, Able Termite Control, Inc., Terminix Norcal, and its successor Terminix International occupied this property. These companies mixed pesticides with thinners. Peerless Electric Company bought the property from Terminix in 1981. Soil investigation conducted in 1983 identified aldrin, heptachlor, and chlordane at hazardous levels and the underlying groundwater detected chlordane and heptachlor. In 1984, the contaminated soil was removed and the surface was sealed.
Comments Date:	01011983
Comments:	Certified Site. A soil removal occurred in 1983. This

FINDS:

Registry ID: 110001194546

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best

DRAFT

CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-17-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Observed silver reclamation units. Several plumbed in series. Silver reclamation units are sent for recycling/recovery. Treated water discharged to sanitary. Note: Damaged silver reclamation unit (split bucket) must be recycled withing 90 days. Documentation is required to be kept for three years. No hazardous waste violations observed.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-17-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Training appropriate to facility operations and documented. Hazardous materials are reported in amounts and locations as reported in 2015.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-14-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Business has a silver reclamation unit. Recycles the silver and disposes of the treated fluid in the sanitary drain. Disposal records were reviewed, compliant. EPA ID Number reported on CERS is inaccurate, should be corrected. EPA ID is inactive but does not need to be active unless business is shipping off hazardous waste.

Violations:
Site ID: 436876
Site Name: Mosaic Materials
Violation Date: 08-30-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 09/26/2018. Business is storing about 3 gallons of solvent. All hazardous materials stored at facility should be reported on the inventory. Business can use categories to report chemicals, chemicals under categories should have similar hazard classes. ex. flammable solvents. Corrective action: Update inventory to include all chemicals and resubmit on CERS.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Site ID: 436876
Site Name: Mosaic Materials
Violation Date: 08-30-2018
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if

DRAFT

present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.

Violation Notes: Returned to compliance on 09/26/2018. Business failed to post emergency information. Corrective action: Complete the template provided by toxics and post in an area accessible to all employees.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

Site ID: 436876
Site Name: Mosaic Materials
Violation Date: 08-30-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 09/26/2018. Business did not provide initial/annual traiining to employees. Corrective action, use template provided by Toxics along with site specific documents to provide training to all employees.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-30-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Business has not generated hazardous waste. Once waste is generated, the inventory will be updated to reflect the waste streams. Waste should be properly labeled once generation begins, Toxics provided a sample label. Toxics to send satellite waste fact sheet. Emergency eye wash/shower and fire extinguishers are available. EPA ID Number, CAR 000 283 457, is currently active.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-30-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Business is not fully transitioned from LBNL.

Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: Not reported
RB Case Number: 01S0671
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History: The former Veriflo facility operated as a metals-finishing plant from 1968 to 1994. The metals finishing process included five sumps which stored acidic solutions. Volatile organic compounds (VOCs) were also used at the Site and were stored in aboveground storage tanks (ASTs). After Veriflo discontinued operations in 1994, soil and groundwater investigations revealed chemical impacts to soil and groundwater beneath the Site.Results of the investigations indicated elevated concentrations of zinc, nickel, and chrome in shallow soils beneath

DRAFT

DAVLIN PAINT COMPANY (Continued) **S103472173**

the former chrome plating room. Elevated levels of VOCs, mostly TCE, were also detected in soil and groundwater sampled near the drain pipes, Sump F located in the pre-treatment room, and the sanitary sewer. In October and November 1996, soils were excavated to remove the heavy metals- and VOC-impacted soils outside the building. The plant building was demolished in 1999. Additional site investigation followed - 13 groundwater MWs were installed at and offsite. Onsite MWs decommissioned due to construction of a new building. There are four remaining offsite wells. Groundwater remediation 2000-2004: injections of potassium permanganate and later implementation of EISB to stimulate degradation of VOCs. Site redeveloped w/new building in 2005. The new building foundation is equipped with a vapor barrier. A passive vent system beneath the slab-on-grade foundation of the new building was installed as an additional mitigation measure to protect on-site occupants from potential intrusion by VOCs vapor. In July 2015 groundwater sampling event of the existing four offiste wells: MW-7, MW-8, MW-10, and MW-11. In general, concentrations of TCE and VC have decreased significantly.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-01-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection contact Alex Teran. Two hazardous waste violations noted, no HMBP violations noted. Haz waste being generated and epa ID # was verified as active. HW manifests, training records were viewed during inspection. Fire extinguishers, eye wash/safety showers and HW labels were out of compliance. The HW labels present did not provide all the required data elements, correct HW labels ordered from vendor at the time inspection.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-11-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Walkthrough Notes: Haz Mat: -Hazardous chemicals throughout facility were properly labeled and stored. -Beakers and test tubes were labeled unless they are being used at the time. -Some chemicals appeared to not be listed in the inventory. Ex: Tetramethylammonium Hydroxide Pentahydrate. - The HMBP is mailed to the property owner annually which notifies the company's compliance with the HMBP program. Waste: -Hazardous waste containers were in proper condition. -Hazardous waste is picked up about once a year. -Silica Gel waste did not have accumulation start date. -Manifest was available for review. Hauler: CAD 059 494 310. Safety: -Training records for the 2016 year was not available. The 2015 training was completed, sign off sheet was available but there was no date. -Fire extinguishers need to be checked this month (October 2016) -Spill kits were available. -Emergency station included all the emergency phone numbers and a telephone near by.

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-24-2013
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Hazardous Materials Business Plan chemical inventory is reported mainly by storage location (i.e. Hood 1). The inventory common name should be listed by hazard chemical class. Due to the size of cyliners compressed gases should be listed separately. Action: 1) Update the inventory to include an inventory for each of the compressed gases, including ammonia, 2) Update the inventory to reflect the room number as part of the chemical location, 3) In place of the storage location (H1) listed in the common name, provide the general hazard class of the materials (i.e., corrosive materials). Under % wt, as these are specific chemicals, indicate 100 for each, 4) For liquids reported, update the quantities and units to gallons, 5) Add to the inventory the hazardous waste (used pump oil, lab waste (toxic).

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 3038

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

DRAFT

CURTIS & TOMPKINS LABS (Continued) **1000427446**

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 15779.6

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Violation Date: 09-18-2014
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: Returned to compliance on 12/17/2014. HSC 25189.5(d) Failed to obtain a permit or other authorization for treatment of hazardous waste. Facility is treating the VOC samples by crushing them, which changes the physical character of the waste. Corrective action: Cease treating hazardous waste or comply with treatment requirements, including notification.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HWLQG
Violation Source: CERS

Site ID: 109197
Site Name: ENTHALPY ANALYTICAL LLC
Violation Date: 08-19-2015
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 08/26/2015. Curtis & Tompkins has a US EPA ID number, CAD980737449. According to DTSC, this number is inactive, as of 6/30/14. Provided screenshot from the hazardous waste tracking system (HWTS). In addition, a subsequent notification is necessary to update the owner information. Corrective action: Complete form 8700-12 and mail to DTSC at the address provided. Provide TMD with a copy of the notification.

Violation Description:	RCRA Large Quantity Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 12/17/2014. 22 CCR 25200.3.1(b), 66262.34(e) Failed to label a hazardous waste container properly. HPLC waste does not list contents, physical state, hazards. Jars collecting waste auto sampler extract vials in Pesticide & PCB lab are labeled incorrectly as asbestos waste, no accumulation start date, no physical state or hazards. The bottles of flammable waste under the hood in extraction lab #3 are not labeled as hazardous waste, have no accumulation start date, or physical state. In Extraction Lab #3, the waste extraction vial container does not have an accumlation start date. Small bottle in mercury lab/metals is not labeled as hazardous waste, contents, accumulation start date, hazards or physical state. Acidic waste in VOC lab does not have accumulation start date. Corrective action: Mark all hazardous waste containers with the words "hazardous waste", accumulation start date (solid date or empty daily), hazard properties, contents, physical state.

Eval Notes:	John indicates Bruce Godfrey has sold business and he has submitted request for change in owner to Montrose Environmental Group in electronic reporting system. TMD will notify you via email when this request has been processed and you may submit your HMBP with the updated owner information. Confirmed completion of training and training records. Reviewed hazardous waste manifest. Noted one manifest, 007600525FLE, dated 7/15/14, not in HWTS. TMD to review with DTSC. Walkthrough - in metals lab, staff indicate if there is product left in a container, he drains to the hazardous waste container, then adds a neutralizer to the container and disposes of solids to trash. Containers in trash were empty. Please confirm that the container meets the California definition of empty prior to treatment. See DTSC guidance "Managing Empty containers." If the containers are not empty, either drain further or obtain an authorization under Conditional Exemption tier.

accurate hazardous waste accumulation time. The facility maintains and conducts weekly inspections of the hazardous waste areas. Observed rinse waste bottle in Unit 1. Employee indicates the bottle is filled and dumped into the hazardous waste bottle daily. The rinse waste bottle is not labeled with "hazardous waste", name and address of generator, hazard properties, accumulation start date. Ben indicates syringes that are no longer to be used or broken are bent and placed in the glassware box. TMD strongly recommends staff discontinue this practice and place them in a non-hazardous sharps container which is more rigid than the box. Observed DCM [Truncated]

Eval Notes: HPLC room - Two units in this area with glass bottles collecting the HPLC waste, acetonitirle/methanol/water. The botttle in the first room which is collecting the waste has a hazardous waste label with a start date of 8/2013. The contents, physical state and hazards are not listed. The bottle in the second room is labeled as hazardous waste and a start date of 7/20/2013. John indicates these bottles are emptied regularly and the HPLC waste has not been accumulating since 2013, even though it is labeled as such. Both bottles are open and the waste lines are directed into the bottle. john indicates the bottle remain here until they need to transfer the waste. TPH-diesel - Waste extract vials are collected in one container in this lab. Once full, transferred to consolidation location. Pesticide&PCB lab - Jars next to each unit are used to collect the waste autosampler extract vials in this area. The jars are all open, no lids in place. the jars are labeled with a [Truncated]

DRAFT

BRANDES PRINTING CO (Continued) **S121743165**

Eval Date:	07-05-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	The facility generates a small quantity of waste fixer, about 2.5 gallons per year. Confirmed the waste disposal record from 1/28/2015. Facility completed training for staff in January. Toxics Management Division will provide information on Alameda County HHW Small Business Program in the case spent inks are generated in the future.
Eval Division:	Berkeley City Toxics Management Division
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-25-2015
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Waste disposal, training docs, available and appropriate. Containers properly labeled and secure. No HW violations observed.
Eval Division:	Berkeley City Toxics Management Division
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	07-05-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Onsite to confirm information submitted in the Hazardous Materials Business Plan submitted 1/3/2017. The inventory reflects the storage of printing inks, blanket wash, oils, and other miscellaneous printing chemicals. The total storage of hazardous materials reported and observed onsite does not meet the hazardous materials registration thresholds of 55 gallons for liquids, 500 pounds for all solids, or 200 cubic feet of gases. The facility is not required to register as a hazardous materials handler. Please submit an updated CERS submittal, which reflects on the business activities that you do not meet the hazardous materials thesholds. The Toxics Management Division will review the file for fee corrections.
Eval Division:	Berkeley City Toxics Management Division
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-25-2015
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Amounts and locations of chemicals and E.R. equipment are consistent with 2015 reporting. No violations observed.
Eval Division:	Berkeley City Toxics Management Division
Eval Program:	HMRRP
Eval Source:	CERS

CERS ID:	10768915
CERS Description:	Chemical Storage Facilities

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-30-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Correlia Biosystems develops assay platforms for proteomic and pharmaceutical applications. Lab area is a shared space, Correlia uses the west half of the lab and stores some chemicals in the flammable cabinet located on the other side. Hazardous materials stored onsite are not over threshold. Hazardous waste is properly stored and labeled. Hazardous waste manifests were available for review. Hazardous waste generator registration form appears consistent with waste on site. Waste is picked up bimonthly by ACT. EPA ID #, CAL 000 437 358, is currently active. Emergency response equipment included a spill kit, fire extinguishers and eyewash/shower. Fire extinguisher near the south end of the lab is has not been properly serviced since 2016 - it should either be removed from the room so it is not used in case of emergency or it should be properly serviced. Emergency posting on door should also include emergency phone numbers for appropriate agencies.

DOJ CRIMINALISTICS LABORATORY (Continued) **S113050902**

CERS:
- Name: OLOGY BIOSERVICES, INC.
- Address: 626 BANCROFT WAY STE D
- City,State,Zip: BERKELEY, CA 94710
- Site ID: 420964
- CERS ID: 10731910
- CERS Description: Chemical Storage Facilities

Violations:
- Site ID: 420964
- Site Name: Ology Bioservices, Inc.
- Violation Date: 12-18-2017
- Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
- Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
- Violation Notes: Returned to compliance on 12/18/2017. Inventory must include all hazardous materials onsite. Since business is a laboratory, categories may be used in the inventory as long as chemicals are similar in hazard class. Corrective action: Update inventory to include chemicals such as Alcohol, Bleach, acids, bases, flammables, dry ice. Chemicals in smaller quantities can be grouped together; chemicals in larger quantities or that
- Violation Division: Berkeley City Toxics Management Division
- Violation Program: HMRRP
- Violation Source: CERS

Evaluation:
- Eval General Type: Compliance Evaluation Inspection
- Eval Date: 12-18-2017
- Violations Found: No
- Eval Type: Routine done by local agency
- Eval Notes: Not reported
- Eval Division: Berkeley City Toxics Management Division
- Eval Program: HW
- Eval Source: CERS

- Eval General Type: Compliance Evaluation Inspection
- Eval Date: 12-18-2017
- Violations Found: Yes
- Eval Type: Routine done by local agency
- Eval Notes: Nanotherapeutics underwent a name change for branding purposes. Name changed to Ology Bioservices, Inc. There were no ownership changes. The address has been changed by the landlord from suite B to Suite D. The business has not moved. Business is currently in the process of obtaining a business license. THe Business name will be updated to Ology Bioservices. Walkthrough: Facility layout is consistent with map provided on CERS. Map identifies the required elements such as haz mat, emergency equipment, exits. Facility has not yet generated any haz waste, so it has not been identified on the map. Upon resubmital on the annual deadline, March 1, please update the map to include hazardous wast and the North direction. No waste shipments have been made- no manifests available for review. Training content were consistent with requirements and provided to all employees. Note: training is an annual requirement. Emergency information was posted and available to all employees. [Truncated]

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:
Site ID: 403473
Site Name: TAKARA SAKE USA, INC.
Violation Date: 06-19-2014
Citation: HSC 6.95 25504(b) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(b)
Violation Description: Failure to include adequate emergency response procedures in the business plan for a release or threatened release.
Violation Notes: Returned to compliance on 07/18/2014. Emergency response plan lists an emergency coordinator who is no longer at the site, Kenzo Shimotori, does not include the phone number of the nearest hospital, and references a "Hazard Communication Standard" Part II, "Emergencies" Section D, "Spills and Release" that Mike is unaware of. Corrective action: Update the uploaded emergency response plan submitted and replace or complete the template provided on the web portal.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Site ID: 403473
Site Name: TAKARA SAKE USA, INC.
Violation Date: 06-19-2014
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 07/17/2014. Observe an open top folgers container in the compressor room and an open can at the base of equipment collecting used oil. Lids do not appear to be available and the can is cut in front as to render it unclosable. Absorbent on ground and collected in cotnainer indicates possible spill, but only residual absorbent remains. A closed container would minimize possibility of spill. In hazardous storage area, 55 gallon drum of used oil has a tall pan that drains into the open top bung hole but no one was actively adding or removing used oil. the 55 gallon used oil drum sits on top of a containment pallet and there is liquid in the containment which appeared to be used oil. Corrective action: Maintain

DRAFT

TAKARA SAKE USA, INC. (Continued) **S121776177**

all containers closed. If funnel is needed for used oil drum, provide one that connects to the drum and latches at the lid. TMD can provide guidance.

TAKARA SAKE USA, INC. (Continued) **S121776177**

Address: 708 ADDISON ST
City,State,Zip: BERKELEY, CA 94710
Site ID: 403473
CERS ID: 262858
CERS Description: Industrial Facility Storm Water

Violations:

Site ID: 403473
Site Name: TAKARA SAKE USA, INC.
Violation Date: 06-19-2014
Citation: HSC 6.95 25504(b) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(b)
Violation Description: Failure to include adequate emergency response procedures in the business plan for a release or threatened release.
Violation Notes: Returned to compliance on 07/18/2014. Emergency response plan lists an emergency coordinator who is no longer at the site, Kenzo Shimotori, does not include the phone number of the nearest hospital, and references a "Hazard Communication Standard" Part II, "Emergencies" Section D, "Spills and Release" that Mike is unaware of. Corrective action: Update the uploaded emergency response plan submitted and replace or complete the template provided on the web portal.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Site ID: 403473
Site Name: TAKARA SAKE USA, INC.
Violation Date: 06-19-2014
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 07/17/2014. Observe an open top folgers container in the compressor room and an open can at the base of equipment collecting used oil. Lids do not appear to be available and the can is cut in front as to render it unclosable. Absorbent on ground and collected in cotnainer indicates possible spill, but only residual absorbent remains. A closed container would minimize possibility of spill. In hazardous storage area, 55 gallon drum of used oil has a tall pan that drains into the open top bung hole but no one was actively adding or removing used oil. the 55 gallon used oil drum sits on top of a containment pallet and there is liquid in the containment which appeared to be used oil. Corrective action: Maintain all containers closed. If funnel is needed for used oil drum, provide one that connects to the drum and latches at the lid. TMD can provide guidance.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

Site ID: 403473
Site Name: TAKARA SAKE USA, INC.
Violation Date: 03-10-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 06/14/2017.

FINDS:

Registry ID: 110002625035

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Status Date:	07/14/2014
Case Worker:	MYM
RB Case Number:	01-3618
Local Agency:	BERKELEY, CITY OF
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	Not reported
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Diesel, Gasoline, Stoddard solvent / Mineral Spriits / Distillates
Site History:	Case history for Preliminary Endangerment Assessment can be found at DTSC, with electronic information captured in DTSC's EnviroStor database. Petroleum corrective actions assigned to the City of Berkeley, Toxics Management Division, by DTSC. Property has been used commercially or industrially as a paint formulator. Commercial/industrial activity at this site spans approximately 100 years. Corrective actions implemented to remove impacted soil. Added observation well in excavation area and added oxygen releasing material to soil/groundwater interface to enhance petroleum degradation in groundwater. Fourth quarter monitoring results due in July 2013. Continued improvement of groundwater suggests corrective action completion has met goals and should be considered for no further action.

Violation Date:	08-24-2016
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 12/19/2016. The inventory is incomplete in that it does not include the used oil, oil, refrigerant, argon, 3020 detergent, phenolphthalein solution, miscellaneous lubricants. Corrective action: Add these items to the inventory in CERS and resubmit. 12/1/2016 - NOV sent. Violation escalated to Class II

DRAFT

BELFIORE CHEESE CO. (Continued) **S121795181**

Violation Date:	08-24-2016
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 12/19/2016. The site map text, when printed or viewed, is difficult to read. The fire extinguishers, north direction, and the evacuation staging area are not shown on the maps. The site maps also do not include the expansion into 2031B. Corrective action: Update the maps to include the expansion into 2031B, increase the text size so it is easily readable, and add the north direction, fire extinguishers and evacuation staging area to at least one of the maps. 12/1/2016 - NOV sent. Violation escalated to Class II
Violation Division:	Berkeley City Toxics Management Division
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	98040
Site Name:	BELFIORE CHEESE CO.
Violation Date:	08-24-2016
Citation:	22 CCR 12 66262.27(b) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.27(b)
Violation Description:	Failure of a small quantity hazardous waste generator to certify to the following statement on the Uniform Hazardous Waste Manifest: "I am a small quantity generator. I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford."
Violation Notes:	Returned to compliance on 12/14/2016. TMD observed spilled liquid on the chemical room floor. In addition, the secondary containment pallets contained liquid. Archangelo indicates the spills and accumulated liquid are washed down the sanitary floor drain. Based on the SDS of the materials stored in this room, many of these spills are likely to be hazardous waste, but the facility has not made a hazardous waste determination. Corrective action: TMD requires the facility develop and implement best practices to minimize spills. And if spills continue, to determine if the spilled material is a hazardous waste, and if so, managed properly.

Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-12-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Obs 1 - hazardous waste - facility is typically not a generator of hazardous waste, however ,observed 5-gallon pail of used hydraulic oil not closed in loading areas. Per Mr. Esposito, this oil was generated by the removal of a hydraulic piece of equipment. Episodic waste - no need for hw permit at this time. Keep container closed. Dispose of per CA regs.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-24-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility has a maintenance area in the 2031 B building. There is a 5 gallon bucket labeled with used oil on the lid. Archangelo indicates this is generated from the maintenance done on the machines around the facility, including the compressor. This is generated routinely The maintenance area used to be a refrigerator and therefore contains a floor drain. TMD recommends this drain be closed off, or better sweeping/cleaning of the area to ensure nothing goes down the drain.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-24-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Staff completed a chemical safety training video, provided by the chemical supplier, in March 2016. Disaster training was completed as part of the food safety training. The business owner/operator form lists the mailing address, owner address, billing contact address and environmental contact address zip code as 94741. The correct zip code is 94710. Corrective Action: Please update the form. Most of the chemicals are stored in the chemical room in drums and tanks. The chemicals are either transferred via a dedicated automatic pump and piping to the production area, or there is a dedicated hand pump which is used to manually dispense the chemical. The room had liquid on the ground. Observed storage of vinegar, lactic acid, calcium chloride solution, multi-chlor, quat sanitizer. The 3344, a detergent with sodium hypochlorite, and the 3020 detergent tanks are both located within a secondary containment basin. There is a hole at the base of the basin which is not [Truncated]

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:
Name: SID'S AUTO
Address: 2412 6TH ST
City,State,Zip: BERKELEY, CA 94710
Site ID: 437869
CERS ID: 10762825
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 437869
Site Name: Sid's Auto
Violation Date: 04-09-2018
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 05/02/2018. On site today for screening inspection. Observed 1-55 gallon drum new antifreeze, 1-55 gallon drum waste antifreeze, 2-5 gallon containers of used oil, 1-75 gallon tank new oil. DA 5/2/2018 - CERS submittal completed and accepted. DA 5/3/2018 - RTC left at counter for Mr. Guthrie to sign. DA 5/4/2018 - RTC received. Reduction in inventory was not observed - received documentation only, threrefore "unobserved" used as RTC qualifier. DA

FINDS:

Registry ID: 110002772232

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site ID: 77266
Site Name: TOYOTA OF BERKELEY BODY SHOP
Violation Date: 11-02-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

DRAFT

TOYOTA OF BERKELEY BODY SHOP (Continued) **S121791788**

greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 11/23/2018. The waste paint related materials drum has accumulation start date of 4/1/2018. This exceeds the 180 days allowed for accumulation. The other hazardous waste containers do not have an accumulation start day. Corrective action: Immediately arrange for the disposal of your hazardous waste. Provide a copy of the disposal receipt to TMD.

FINDS:

Registry ID: 110002781543

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002754494

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

POLYPLUS BATTERY CO., INC. (Continued) **S121745277**

Violations:

Site ID:	144329
Site Name:	POLYPLUS BATTERY CO., INC.
Violation Date:	02-10-2016
Citation:	HSC 6.95 25508.1(a)-(e) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(e)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name.
Violation Notes:	Returned to compliance on 10/13/2016. Failed to report small quantity amounts of various reagents on annual HMBP submittal, per Berkeley Municipal Code.
Violation Division:	Berkeley City Toxics Management Division
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	144329
Site Name:	POLYPLUS BATTERY CO., INC.
Violation Date:	02-07-2019
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 03/08/2019. The Emergency Response Training Plan indicates that safety meetings are conducted at least once every two weeks and they cover emergency response, safe methods for handling, storing and labeling chemicals, hazardous materials and hazardous wastes, and hazard communication at least once per year. The facility does not have records that confirm employees have been trained in these topics every year. Corrective action: Provide a training to employees that covers the safe handling, storage and labeling of hazardous materials, emergency response procedures and hazard communication. Provide a copy of the training record to Toxics Management Division. In the future, provide training in accordance with the training plan or update the training plan to reflect the frequency of safety meetings/trainings.

Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 09/20/2018. The EPA ID number for the facility, CAL000345337, is inactive. Hazardous waste handlers are required to verify their hazardous waste ID number information per Health & Safety Code section 25205.16 and maintain an active EPA ID number when generating, treating, storing, disposing of, transporting, or offering for transportation a hazardous waste. The reactivation application was submitted this date to DTSC. In addition, ensure that you are completing the EPA ID number verification questionnaire (eVQ), which is an online system through DTSC, in July every year.

Violations:
Site ID: 145190
Site Name: Propel Fuels, Inc. (202018)
Violation Date: 08-13-2014
Citation: 23 CCR 16 2711(a)(8) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2711(a)(8)
Violation Description: Failure to submit, obtain approval, or maintain a complete/accurate plot plan.
Violation Notes: Returned to compliance on 10/02/2014. The site plan provided in the UST submittal on CERS is inadequate as it does not include piping , sensor locations or the vent. The site map submitted in CERS is more complete and may be referenced as the site plan, however, it is difficult to read (numbers and type too small). Corrective action: submit an update site plan/ map

Violation Source:	CERS
Site ID:	145190
Site Name:	Propel Fuels, Inc. (202018)
Violation Date:	08-04-2016
Citation:	HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Description:	Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak.
Violation Notes:	Returned to compliance on 08/04/2016. Observed that E85 piping to UDC from STP sump secondary containment valve was closed at sump. this did not allow for detection of a leak at the earliest possibility. Corrected onsite as contractor opened the valve.
Violation Division:	Berkeley City Toxics Management Division
Violation Program:	UST
Violation Source:	CERS
Site ID:	145190
Site Name:	Propel Fuels, Inc. (202018)
Violation Date:	01-14-2016
Citation:	HSC 6.7 25290.2(d) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.2(d)
Violation Description:	Failure of the UST system installed on or after July 1, 2003 and before July 1, 2004 to comply with one or more of the following: be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment.
Violation Notes:	Returned to compliance on 01/25/2016. Discovered failed vacuum sensor. Will return to replace next week.

Violation Source:	CERS
Site ID:	145190
Site Name:	Propel Fuels, Inc. (202018)
Violation Date:	08-29-2018
Citation:	Un-Specified
Violation Description:	UST Program - Administration/Documentation - General Local Ordinance - Must include violation description and proper ordinance citation in the "comment" section.
Violation Notes:	no fire extinguisher present. Must provide a currently certified Fire Extinguisher to be readily available in the event of a fire.
Violation Division:	Berkeley City Toxics Management Division
Violation Program:	UST
Violation Source:	CERS
Site ID:	145190
Site Name:	Propel Fuels, Inc. (202018)
Violation Date:	08-13-2014
Citation:	23 CCR 16 2638 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638
Violation Description:	Failure to test leak detection equipment as required every 12 months (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test
Violation Notes:	Returned to compliance on 10/13/2014. Owner/operator has not submitted the 2012 or 2013 monitoring system certification results to TMD within 30 days after the completion of the inspection. In addition, the sensor model numbers listed on the 9/6/11 monitoring system cert report completed by Gettler-Ryan do not match up with the model numbers listed in the monitoring plan. For example, the piping sump sensors are listed as 794380-208 on the monitoring system cert, but are listed as 794380-323 on the monitoring plan. corrective action: Submit the 2012, 2013 and 2014 monitoring system certification results to TMD. Please confirm the model #s of the sensors onsite and provide updated documents as necessary.

Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-13-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: met with Tim Adams, Gettler-ryan, for annual monitoring system certification. Confirmed Veeder Root, ICC and VMI certification. Reviewed system setup and received a copy of alarm history. At the time of arrival, the sensors in the STP sump had been raised. Per Tim, the sensors were at the lowest point and he had raised them in preparation for testing. Confirmed operation of E85 and biodiesel STP sump sensors and positive shutdown. Confirmed operation of biodiesel and E85 STP brine sensors as low liquid alarm. Confirmed operation of annular tank sensor for low and high alarms. Confirmed E85 fill brine sensor and fill sump sensor alarms and biodiesel fill sump and fill brine sensors. Confirmed vent sump sensor and vent sump brine alarms and UDS sump sensor and UDC brine sensor alarms, positive shutdown. Confirmed smart sensor operation for biodiesel (s3, s4 - no vacuum, s4, s3 - high liquid) and E85 (s2, s1 - no vacuum, s1, s2 - high liquid). E85 and biodiesel line [Truncated]

Eval Type:	Routine done by local agency
Eval Notes:	Met Robert Slunaker of Tank Tek on site to observe the annual monitoring certification. Checked Robert's certifications, all were current. LAst DO training record indicated training occurred on 7/6/17. DO reports were all available on-site. Sumps and dispenser were dry and clean. Tested sensor out and fail-safe, both shut down the turbines. Tested sump sensors and dispenser sensor, all shut down the turbines. Tested interstitial brine sensors all alarmed. Pulled the brine sensor in the interstitial of the dispenser, system alarmed. Tested vent box sensor and interstitial sensor, both alarmed. Tested smart sensors, high liquid and vacuum, both alarmed. Tested line leak detectors, both went into slow flow and alarmed.

Eval Notes:	Routine announced hazardous materials business plan, hazardous waste and underground storage tank facility compliance inspection. Service contractor was present for the annual monitoring system inspection. Overfill protection for the two tanks- flapper valves present for both tanks. Diesel and e 85 fuel present. Snap tabs were apparently left on as a permanent device. Due to not meeting manufacturing recommended requirements the Snap tabs were removed as required by TMD. SB989 testing not required. Vent pipe sensors, 2 were tested. No fire extinguishers present, instructed to provide as soon as possible.

Eval Type: Routine done by local agency
Eval Notes: Onsite for routine inspection at time of monitoring system certification. Met with Richard Thomas with Tank-Tek. Confirmed certifications and received system setup and alarm history. November 12, 2015 alarms - VR showing warm start loop and they completed cold start. Jan 14, 2016 alarms and they completed cold start. Reviewed monthly DO reports and CERS submittal from 6/10/2016 and appear to be accurate. Observed green brine staining on E85 and diesel STP sumps. This area should be kept clean to allow for easy identification of spills or leaks. Contractor confirmed proper programming of sensors at panel and confirmed operation of sensors.

Citation: 23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: The alarm history was wiped out sometime between 3/15/18 and 4/11/18. April 2018 DO report needs to be revised and submitted to TMD to indicate why the alarm history was wiped out, and how long the monitoring panel was disconnected for.

California Electronic Reporting System. Designated Operator (DO) reports were reviewed: The alarm history was wiped out sometime between 3/15/18 and 4/11/18. April 2018 DO report needs to be revised and submitted to TMD to indicate why the alarm history was wiped out, and how long the monitoring panel was disconnected for. Training provided by the DO on 2/1/19. New plot plan needs to be electronically submitted showing where the panel is [Truncated]

Eval Division: Berkeley City Toxics Management Division
Eval Program: UST
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-07-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Met Bill and Tony of UST Compliance Testing, Inc. to observe the annual monitoring certification. Sump sensors were tested and all shut down the turbines. Annular sensors were tested and all passed. Spill buckets were hydrostatically tested for one hour and passed. UDC Chain floats easily tripped. All sumps and dispensers were clean and dry. Tony and Bill's certifications were current. DO records were reviewed. All were available. DO training record was available. Last training was 12/21/16.

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Alcohols, Acetone, Trichloroethylene (TCE), Diesel, Gasoline, Kerosene
Site History: The Site has operated as a bus maintenance facility for the Berkeley Unified School District (BUSD) from 1971 to 1994, when the property was sold to Miles in 1992. Prior to 1971 it was used by a storage tank and rail car manufacturer. The current Site is a portion of the

DRAFT

BAYER, FORMER MILES/CUTTER/BERKELEY UNIFIED SCHOOL DISTRICT (Continued) **S108205108**

Miles facility with two (2) buildings, one a vehicle maintenance structure, and the other an office. Four (4) underground fuel storage tanks (UFSTs) and one (1) underground storage tank (UST) and one (1) oil-water separator were removed from the Site in 1993. Approx. 1,850 cubic yards of soil were also removed, along with 2,700 gallons of groundwater in order to help in the excavation process.

RB Case Number:	01-0201
Local Agency:	BERKELEY, CITY OF
File Location:	Not reported
Local Case Number:	TT01-0201
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	The Berkeley Warehouse and Draying Company is a family-owned business that stores and delivers a variety of consumer goods to commercial customers using company vehicles formerly fueled by onsite underground storage tanks (USTs). The company has operated at the property since 1959. Originally, a single 6,000-gallon UST supplied the fuel needs, located under the current driveway entry to the parking area now paved by asphalt cover. The fuel UST was replaced by two USTs in 1988, a 6,000-gal diesel UST and one 4,000-gal gasoline UST. In July, 1994 a heating oil UST from offsite (620 Hearst Street) was removed, and in October 1994 a release of heating oil and diesel was reported by Azure Environmental. In June, 1994 three (3) groundwater monitoring wells were installed. In September 1998, the Toxics Management Division (TMD) of the City of Berkeley requested the former USTs be removed. Tank removal began in 1999, and excavations were bac-filed by February 2000, followed by a request for 'no further action'. Case transfer to Regional Board from TMD was issued in June 2013.

FINDS:

Registry ID: 110002629601

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Gasoline, Total Petroleum Hydrocarbons (TPH)

Site History: The Cutter Laboratory began operations at its present west Berkeley site in 1917. In 1974, Cutter Laboratories was purchased by Bayer AG of Germany and in 1983, was merged into Miles, Inc. In 1992, Miles, Inc. purchased the 5.6 acre parcel then occupied by the Gary Steel Company, the City of Berkeley School Bus Yard, and Western Intermodals. The Miles facility became a nearly 30-acre site located in the industrially zoned flatlands area west of San Pablo Avenue. The project site contains various one-to three-story research laboratories, process/manufacturing facilities, storage/warehouse buildings and administrative/office buildings.The facility has historically used numerous underground storage tanks (USTs) for storage of hazardous materials, all of which have been removed; contamination has been encountered and documented for these USTs.

Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Potential Media Affected: Under Investigation
Site History: The subject property (Site) is located on the west side of San Pablo Avenue in Berkeley, California. Property owner claims former tenant "placed" underground storage tanks (USTs) on Site without his (owner's) permission or consent. Unknown concentration, type, and extent of contaminant(s) on Site. On 10/2/20107, REL and LMM decided to make this case non-case based on the absence of a directive letter acknowledging an unauthorized release at the Site.

auto wrecking yard on site to approximately 1980. The property originally extended from San Pablo to 10th Street and consisted of a storage lot and a brick building used to support auto wrecking activities. The western half of the lot was sold and residential homes were built on 10th Street. In 1967 or 1968, most of the site was paved except, two small areas located west along the fence separating residential homes and this site. Soil contamination is located in an unpaved section of approximately ten (10) feet by forty (40) feet, along the property's western boundary adjacent to residential homes' backyards. An A&W Rootbeer restaurant was built on the eastern portion of the lot and operated until 1980. In 1980, the restaurant closed, and the eastern parcel was divided into two lots, Ali Baba restaurant and Greg's Auto Repair (in the brick building) which occupied the northern and southern portion respectively. The auto repair shop operated under Greg's Auto Repair (Mr. Greg Below, owner of the business) from 1980 to March 1983. In 1983, the shop was rented to Mr. Peter Mitchell. The shop operated from 1983 to 1988 under various names such as Mitchell's Auto Repair, Peter's Automotive Service, Peter Mitchell Imports and Berkeley Auto Repair. Droubi Nahla bought the property in April 1999. The site is fenced off. Currently, there are no business activities at the site.

Way to the south on San Pablo Avenue. Julius Chase purchased the property in 1939 from Joe Long and operated an auto wrecking yard on site to approximately 1980. The property originally extended from San Pablo to 10th Street and consisted of a storage lot and a brick building used to support auto wrecking activities. The western half of the lot was sold and residential homes were built on 10th Street. In 1967 or 1968, most of the site was paved except, two small areas located west along the fence separating residential homes and this site. Soil contamination is located in an unpaved section of approximately ten (10) feet by forty (40) feet, along the property's western boundary adjacent to residential homes' backyards. An A&W Root Beer restaurant was built on the eastern portion of the lot and operated until 1980. In 1980, the restaurant closed, and the eastern parcel was divided into two lots, Ali Baba restaurant and Greg's Auto Repair (in the brick building) which occupied the northern and southern portion respectively. The auto repair shop operated under Greg's Auto Repair from 1980 to March 1983. Under different ownership, the shop operated from 1983 to 1988 under various names such as Mitchell's Auto Repair, Peter's Automotive Service, Peter Mitchell Imports and Berkeley Auto Repair. The property was sold in April 1999. Currently, there are no business activities at the site. The site is fenced.

CA BOND EXP. PLAN:

Reponsible Party:	TIER 3 (MINIMUM HAZARD THRESHOLD SITE) REPORT
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	Not reported
Site Description:	This site includes an auto repair shop and a restaurant. The auto repair shop is a small building at the back of a narrow, fenced, asphalt-paved yard and the restaurant is located to the north. There have been auto repair shops on the site for the last 8-9 years. Prior to that, an auto wrecking yard operated at the site.
Hazardous Waste Desc:	Moderate levels of methylene chloride in waste oils present in the soil at this site have been detected. Low to moderate levels of lead have also been detected. A citizen's complaint of oily waste runoff brought this site to the Department's attention in 1985.
Threat To Public Health & Env:	Not reported
Site Activity Status:	As a Tier 3 site, this site will be listed annually in this report. When this site has been abated to the satisfaction of the City of Berkeley, the responsible parties will be encouraged to submit a report of abatement action. If it appears that theaction was satisfactory, this site will be assigned a "no further action" status and deleted from the active site database.

DRAFT

2371 SAN PABLO AVENUE (Continued) **S118353735**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 08/25/2016
Comments: DTSC provided comments during the meeting held with the RP and his consultant. RP is to conduct additional groundwater sampling to determine the horizontal extend of contamination and to address vapor intrusion issue underneath the building in crawling space area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 04/12/2017
Comments: Workplan to collect additional groundwater samples and to install interim measures which vent sub-slab vapors from under the building while site is characterized.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/30/2017
Comments: Interim measures including a vapor barrier and two venting systems were installed. Indoor air samples were collected in both the residential & commercial spaces in early June. An additional indoor air sample was collected in the commercial space on June 29.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 09/21/2015
Comments: Elevated concentrations of tetrachloroethene found in soil gas at the site. This report was not prepared under DTSC oversight.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 11/20/2015

Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0600100776
Global Id: T0600100776
Latitude: 37.8706
Longitude: -122.3035
Status: Open - Assessment & Interim Remedial Action
Status Date: 05/09/2018
Case Worker: CCM
RB Case Number: 01-0842
Local Agency: BERKELEY, CITY OF
File Location: Local Agency
Local Case Number: 01-0842
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Diesel
Site History: Diesel released to subsurface due to rupture of primary tank - single walled fiberglass. Groundwater extracted following tank failure and skimmed from extraction well. Free product not detected June 2010 with decreasing concentrations of diesel. Project is located in fill soil/material of unknown source. Migration to potential beneficial uses of groundwater is prohibited by thickly bedded clay soil. No offsite impact or apparent health or environmental receptors. Fiberglass UST removed 2/1/2018 which exposed TPHd impacted soil and groundwater at concentrations 100 times higher than environmental screening levels. City of Berkeley called in Water Board staff and concurred that a significant risk to human health and the environment existed and secondary source removal was practicable, that case should be reopened, and Water Board should be lead agency.

CPS-SLIC:
Name: TOWER CLEANERS
Address: 1110 UNIVERSITY AVENUE
City,State,Zip: BERKELEY, CA 94702
Region: STATE
Facility Status: **Open - Assessment & Interim Remedial Action**
Status Date: 05/31/2019
Global Id: T10000002262
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: Uni1110
Latitude: 37.8688741459668
Longitude: -122.291307449341
Case Type: Cleanup Program Site
Case Worker: PF
Local Agency: Not reported
RB Case Number: 01S0744
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Site History: The site was used as a dry cleaning facility for more than 40 years until 2009, with the current structures (a laundry and residential unit on the ground floor, and several apartments on the second floor) built in the 1940s. The current laundry business does not perform any dry cleaning on-site. Planned redevelopment is slated to occur in 2019, pending permit issuance from the City of Berkeley. Based on assessments to date, the dry cleaning solvent perchloroethylene (PCE) is present in soil, soil gas, and groundwater at concentrations which could pose a risk of vapor intrusion into the site's current residential units, and future planned redevelopment of the site. PCE concentrations in indoor air are currently being mitigated by the use of air filtration systems installed in business and residential units. TCE detected in indoor air does not appear to be associated with the PCE releases at the site during dry cleaner operations since TCE concentrations detected in soil vapor or groundwater were very low relative to PCE in December 2018 data.

FINDS:

Registry ID: 110001153108

Environmental Interest/Information System
HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency:	BERKELEY, CITY OF
File Location:	Local Agency
Local Case Number:	TTSPA1900
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Gasoline
Site History:	The subject property (Site) is located on the southwestern corner of San Pablo and Hearst avenues in Berkeley, California. The former gas service station (Chevron) operated from 1937 to 1972. Currently, the Site is a vacant lot with grasses and weeds over some evidence of the former station with patches of asphalt and concrete pavement exposed on the east / central portion of the parcel. No data on former underground storage tanks (USTs) was found in the investigations.

Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 9038.5

Waste code: D007

ELECTRO-COATINGS OF CALIFORNIA INC (Continued) **1000181777**

Lead Agency Case Number:	Not reported
Latitude:	37.8571005548451
Longitude:	-122.293399572372
Case Type:	Cleanup Program Site
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	01S0742
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Not reported
Site History:	Groundwater contamination due to a plating shop operations since 1960's; historical spills and leaks around tanks with chromic acid. Groundwater and soil contaminated with total and hexavalent chromium. Soil and groundwater chromium contamination has been found on- and offsite. In 1991 the City of Berkeley TMD required the RP to prepare a work plan for chromium 6 contamination delineation in soil and GW, a feasibility study for corrective actions to remove chromium from soil and GW, risk assessment, and evaluation of the facility storm water pollution prevention plan. Implementation of the in-situ reduction of Cr 6 to Cr 3 as proposed in the 3/1998 Arcadis Gerathy & Miller revised CAP; installation of 12 injection points on- and offsite and injections of an enriched carbohydrate solution into the saturated and vadose zones in 12/1998 and 4/1999. Site closure requested from the TMD in April 2005 by Tamalpais Environmental Consultants (TEC) based on low concentrations in GW. Additional subsurface treatments in 11/2008 to address residual Cr 6 at the site based on results from well MW-1 downgradient of the former source area. Temporary injection points installed to inject a remediation mixture w/whey and an emulsified soybean oil. An additional round of groundwater remediation injections performed in four locations in June 2013 to address chromium 6 detected in well MW-1.The concentration of chromium 6 in MW-1 was below 10 ug/L during the groundwater monitoring events conducted in 12/2014 and 12/2015 by TEC .

ELECTRO-COATINGS OF CALIFORNIA INC (Continued) **1000181777**

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

OSHA ESTABLISHMENT

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS AIR POLLUTANT MAJOR

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Background Info: The Colgate-Palmolive Company plant (10.4 acres) in Berkeley, produced soaps, and personal and household cleaning products from 1916 until 1981. It consisted of 27 buildings, a tank farm, several individual storage tanks, and other structures. Colgate-Palmolive Company was issued an Interim Status Document in April 6, 1981. In October 1981 the Colgate-Palmolive plant ceased operation at the site.
Comments Date: 03281988
Comments: Certified Site. Cleanup of the site began in early 1985 and was
Comments Date: 03281988
Comments: completed in December 1985. Soils were excavated and disposed
Comments Date: 03281988
Comments: offsite. Sampling in March 1985, after the cleanup, found

Background Info: K and S Management Company managed 32 units in a four-plex building located between Hearst and Delaware Street. On June 1983, an inspection of the 32 units was conducted in response to a citizen complaint. Paint chips (lead-based) from water blasting operation prior to repainting had accumulated around the bases of the building. The blasting company removed from all

DRAFT

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name:	Berkeley Industrial Court
Completed Sub Area Name:	Not reported
Completed Document Type:	* Discovery
Completed Date:	09/26/1981
Comments:	Facility identified from EPA Superfund list.

Completed Area Name:	Berkeley Industrial Court
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	02/15/2005
Comments:	Site screening determined that PCBs, lead, nickel, and petroleum hydrocarbons had previously been detected in soil samples collected from the Berkeley Industrial Court site. The City of Berkeley has overseen sampling at the site in an effort to characterize chlorinated solvent occurrence in area groundwater.

Completed Area Name:	National Starch and Chemical Company
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	11/12/2004
Comments:	Site screening concluded that chlorinated solvents were present in groundwater beneath the National Starch site. The City of Berkeley has overseen sampling at the site in an effort to characterize the occurrence of chlorinated solvents in area groundwater.

Completed Area Name:	Berkeley Industrial Court
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Assessment Report
Completed Date:	04/01/1986
Comments:	Confirmed DHS Preliminary Assessment information. Nine samples taken.

File Location:	Local Agency
Potential Contaminants of Concern:	Diesel
Potential Media Affected:	Soil
Site History:	The commercial property is located on the western side of San Pablo Ave in Berkeley, California. Surrounding the Site are other, similar commercial and some residential properties.. The parcel is nearly completely covered by the single, rectangular-shaped single-floored structure. In July of 1989, an illegal discharge (release) was reported when a 1,000-gal underground diesel tank (UST) was removed and contaminated soil discovered. Analyses of soil samples collected on Site indicated total petroleum hydrocarbon as diesel (TPH-d) as high as 630 mg/kg. Groundwater monitoring wells were planned to be advanced in 1991 under the direction of Aqua Terra Technologies, Consulting Engineers & Scientists.

BERKELEY INDUSTRIAL COMPL (Continued) **S102008166**

RB Case Number: 01S0387
File Location: Local Agency
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Trichloroethylene (TCE), Polychlorinated biphenyls (PCBs), Copper, Lead, Nickel, Zinc, Diesel
Site History: Prior to 1978, this site was operated by Airco, now referred to as Temescal Business Center. The BIC portion of the site was historically utilized as a storage area for old equipment, spent dolomite, and neutralized chemical etching waste prior to disposal. Prior to Airco's ownership of the site, Hall Scott Marine Engine Foundry occupied the site before and during World War II. They produced engines for naval ships during World War II; however, the exact scope of their activities is unknown. The site currently supports three buildings and a nursery on an approximate 1. 5 acre parcel. Berkeley Industrial Complex is presently a multi-tenant industrial complex. The main tenants include Magic Garden Nursery, Goldberg Cabinets, and Artworks Foundry. Seventy-five percent of the property is utilized to grow, store and sell plants, shrubs and trees. The site is bounded by Temescal Business Center to the east, and National Starch and Chemical to the north. A Southern Pacific railspur forms the northwest boundary. Since 1978 there has been no chemical storage or heavy industrial practices which would lend to the potential for soil and/or groundwater impaction.

Description: The 13.53-acres site is located in the vicinity of Ashby Ave. & 7th St. in the City of Berkeley, Alameda County, CA. The site is now built-over and occupied by numerous private businesses, both commercial & industrial. Examination of the streets and buildings did not identify any remains of Camp Ashby.
History: On 1 January 1942, 12.65 leased acres and 0.88 permit acres were acquired from private owners, the State of California and the City of Berkeley for the San Francisco Port of Embarkation in the 6th Army

DRAFT

CAMP ASHBY (Continued) **1007211901**

Area. The total acreage acquired was 13.53. The leases terminated between 1 January 1942 and 11 October 1946. The permit terminated on 11 Oct 1946. The site was used as a military police installation. There are no potential hazards currently identified at this site.

NAVAL INDUSTRIAL RESERVE PLANT BERKELEY (Continued) **1008196518**

Fiscal Year:	2013
Federal Facility ID:	CA9799F5271
RAB:	Not reported
NPL Status:	Not Listed
Description:	The 2.94-acre site is located at 735 Ashby Avenue in the City of Berkeley, Alameda County, CA. In 1965, Mr. Phelps Dodge of Airco, Inc. installed a high temperature furnace and several transformers on the property. In the 1960s, three underground storage tanks (USTs) were removed and three aboveground storage tanks (ASTs) were removed between 1977 and 1988. In removing the ASTs, the property owner discovered contaminated soil, which he believes was contaminated from adjacent inactive pipelines as the ASTs were not leaking. The property owner stockpiled the contaminated soil for Department of Defense (DoD) removal. There have been allegations of illegal dumping of Polychlorinatedbiphenyls (PCBs) from transformers at the site by Barker Machinery. Two 2,000-gallon USTs were installed in 1985, one for motor oil and one for waste oil. The current owners are Timothy and Susan Southwick, who purchased the site in May 1987 for use as a car dealership.
History:	On 9 February 1942, the U.S. acquired 2.46 fee acres by Declaration of Taking. Another 0.48 acre was acquired but records do not indicate when how, or where. Total acreage was 2.94. The Navy used the site as a steel forger facility and installed two USTs during occupation. On 18 June 1963, 2.94 fee acres were quitclaimed to Lerner Invest Co, subject to right-of-way and easement restrictions. There are no recapture rights. Mr. Phelps Dodge of Airco, Inc. acquired the site in 1965. Barker Machinery purchased the property in January 1978 for wholesaling large machinery. The current owners are Timothy and Susan Southwick, who purchased the site in May 1987. The underground storage tanks left by the DoD have not been beneficially used. Known releases of hazardous waste occurred at the site and impacted soil quality but have since been remediated. Currently, there are no further potential hazards identified at this location.

RB Case Number:	01S0672
File Location:	Local Agency
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Kerosene, Lead
Site History:	Flint Ink operated as a black ink manufacturing facility between 1900 through 2004. The area has been in heavy industrial use for over 100 years and other recognized sources of contamination are nearby. When operations ceased in 2004, the property contained buildings, aboveground and underground storage tanks (ASTs and USTs), and related infrastructure. Surface spills of diesel, motor oil and kerosene were present near the ASTs, and at least 3 of the 7 identified USTs may have leaked or been overfilled. Primary source removal in 2005 and 2006 included demolition of all ASTs, associated pipes, and any affected infrastructure; closure in place by City of Berkeley Toxics Management Department of two potentially leaking USTs which are under slabs and structural elements of historic buildings; removal of one leaking 300-gallon UST; removal of four intact USTs; and discovery and closure of two deep process water wells. Secondary source removal included excavation and removal of 19,000 tons of impacted soil and replacement with clean fill; and removal and disposal of approximately 370,000 gallons of groundwater. A ground water monitoring program with 13 wells was established that tests for total petroleum hydrocarbons (TPH) and volatile organic compound (VOCs). VOCs are currently present in groundwater in the northeast corner of the site. A No Further Action/Closure Letter for the ASTs and UST releases was issued for the property located at 1350 Fourth Street, a portion of the former Flint Ink facility.

FINDS:

Registry ID: 110002635168

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/19/2019
Date Data Arrived at EDR: 07/30/2019
Date Made Active in Reports: 09/03/2019
Number of Days to Update: 35

Source: EPA
Telephone: N/A

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DRAFT

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

DRAFT

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Version Date:	2012
North Map:	5640624 RICHMOND, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

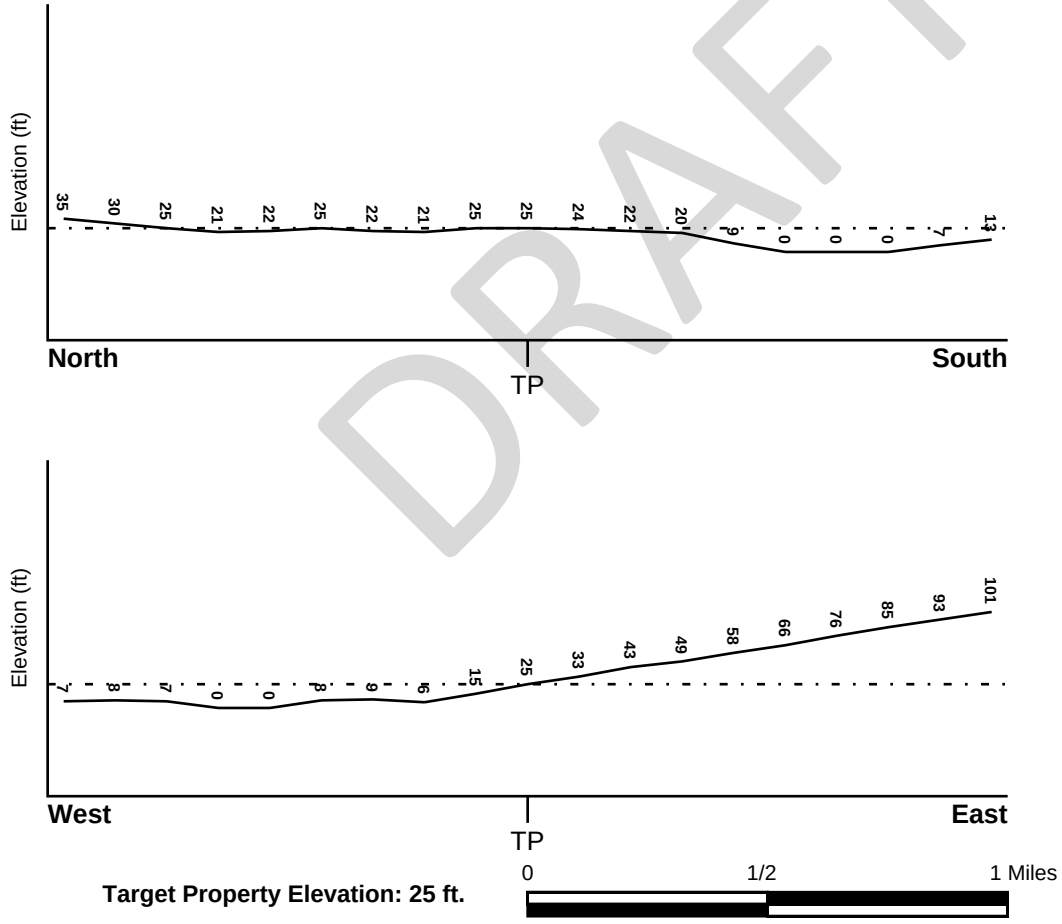

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

DRAFT

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06001C0056G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06013C0243G	FEMA FIRM Flood data

06001C0052G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OAKLAND WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	0 - 1/8 Mile ESE	NW

6G	1/2 - 1 Mile SE	NE, SE

For additional site information, refer to Physical Setting Source Map Findings.

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Dear Ms. Javier:

On October 29, 2019, the Berkeley Department of Toxic Substances Control received your request issue dated October 29, 2019 for records under the California Public Records Act. After a thorough review of our files, we found that we do have records for some of the sites/facilities referenced in your request, but not for all of your requested sites.

We have records for:
2220 4th St., Berkeley, CA 94710

We do not have records for:
701-747 Bancroft Way; 2200-2231 4th St.; 2212-2246 5th St,, Berkeley, CA 94710

Those records we do have on site have been cleared for your review on November 6, 2019. Please contact our regional office's file room at (510) 540-3800 in order to schedule an appointment to review the records. You may also wish to refer to Envirostor, our database containing information and documents on several thousand DTSC cleanup sites. EnviroStor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. A computer is also available in the Central File Room of regional offices for community use to review EnviroStor's records.

Sincerely,

Carl Rose

DRAFT

FILE COPY

Printed on Recycled Paper

BERKELEY
2220 - 4TH STREET

STATE OF CALIFORNIA
ENVIRONMENTAL PROTECTION AGENCY
DEPARTMENT OF TOXIC SUBSTANCES CONTROL

In the Matter of: Peerless Electric	Docket No. _____
	Voluntary Cleanup Agreement
Proponent:	Health and Safety Code Section 25355.5(a)(1)(C)
Doug Herst Herst Ventures, Inc. P.O. Box 2556 Berkeley, California 94702-0556	

DRAFT

The California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) and Herst Ventures, Inc. (Proponent) enter into this Voluntary Cleanup Agreement (Agreement) and agree as follows:

1. Site. This Agreement applies to the property located at 2220 Fourth Street in Berkeley, Alameda County, California (Site), identified by Alameda County Assessor's Parcel Numbers 056-1957 and 056-1957-23 (parcels) and the embankment which is located on a portion a railroad property to which hazardous substances are located. The Site is approximately 0.28 acres in size, rectangular in shape, and is bordered by the railroad property to the west and by other industrial properties on the other sides. A Site location map and a Site diagram map are attached as Exhibits A and B respectively.

2. Jurisdiction. This Agreement is entered into by DTSC and Proponent pursuant to Health and Safety Code section 25355.5(a)(1)(C) which authorizes DTSC to enter into an enforceable agreement to review and comment on technical reports, an operations and maintenance plan agreement, and prepare and file deed restrictions related to hazardous substance at or from the Site.

3. Purpose. The purpose of this Agreement is for DTSC to restrict future usage of the parcels and the embankment which is a portion of the adjacent railroad property. The purpose of this Agreement is also for DTSC to obtain reimbursement from Proponent for DTSC's costs incurred pursuant to this Agreement.

4. Ownership. Herst Ventures, Inc. owns parcels APN 056-1957-23 and 056-1957-24, and Union Pacific Railroad owns the embankment which is a portion of the railroad property.

5. Substances Found at the Site. Based on the information available to DTSC and Proponent, the Site is contaminated with hazardous substances, including chlordane, dieldrin, and pentachlorophenol.

6. Scope of Work and DTSC Oversight. DTSC shall review and comment on a Completion Report for Capping Embankment Soils, an Operations and Maintenance Plan, and prepare deed restrictions as shown in Exhibit C. DTSC shall also prepare an Operations and Maintenance Plan Agreement.

7. Additional Activities. DTSC and Proponent may amend this Agreement to include additional activities in accordance with Paragraph 9 of this Agreement. If DTSC expects to incur additional oversight costs for these additional activities, it will provide an estimate of the additional oversight costs to Proponent.

8. Payment.

8.1. Proponent agrees to pay 1) all costs incurred by DTSC in association with preparation of this Agreement, and for oversight activities, including review of documents, conducted prior to the effective date of this Agreement, and (2) all costs incurred by DTSC in providing oversight pursuant to this Agreement, including review of the documents described in Exhibit C and associated documents. Costs incurred include interest on unpaid amounts that are billed and outstanding more than 60 days from the date of the invoice. An estimate of DTSC's costs is attached as Exhibit D. It is understood by the parties that Exhibit D is an estimate and cannot be relied upon as the final cost figure. DTSC may provide an updated or revised cost estimate as the work progresses. DTSC will bill Proponent quarterly. Proponent agrees to make payment within 60 days of receipt of DTSC's billing. Such billings will reflect any amounts that have been advanced to DTSC by Proponent.

8.2. In anticipation of oversight activities to be conducted, Proponent shall make an advance payment of $7,544.00 to DTSC no later than 10 days after this Agreement is fully executed. It is expressly understood and agreed that DTSC's receipt of the entire advance payment as provided in this paragraph is a condition precedent to DTSC's obligation to provide oversight, review of or comment on documents. If the advance payment exceeds DTSC's final costs, DTSC will refund the difference within 120 days after the performance of this Agreement is completed or after this Agreement is terminated pursuant to Paragraph 10 of this Agreement.

8.3. All payments made by Proponent pursuant to this Agreement shall be by check payable to the "Department of Toxic Substances Control", and bearing on its face the project code for the Site (Site # 201519) and the docket number of this Agreement. Upon request by Proponent, DTSC may accept payments made by credit cards. Payments by check shall be sent to:

Department of Toxic Substances Control
Accounting Office
1001 I Street, 21st Floor
P.O. Box 806
Sacramento, California 95812-0806

DRAFT

BERKELEY
2220 - 4TH STREET
PEERLESS ELECTRIC
9/22/2002 - 9/22/2002

A photocopy of the check shall be sent concurrently to DTSC's Project Manager.

8.4. DTSC shall retain all cost records associated with the work performed under this Agreement as may be required by state law. DTSC will make all documents that support DTSC's cost determination available for inspection upon request in accordance with the Public Records Act, Government Code section 6250 et seq.

9. Amendments. This Agreement may be amended in writing by mutual agreement of DTSC and Proponent. Such amendment shall be effective the third business day following the day the last party signing the amendment sends its notification of signing to the other party. The parties may agree to a different effective date.

10. Termination for Convenience.

10. Except as otherwise provided in this paragraph, each party to this Agreement reserves the right to unilaterally terminate this Agreement for any reason. Termination may be accomplished by giving a 30-day advance written notice of the election to terminate this Agreement to the other party. In the event that this Agreement is terminated under Paragraph 10, Proponent shall be responsible for DTSC costs through the effective date of termination.

11. Incorporation of Exhibits, Plans and Reports. All exhibits are incorporated into this Agreement by reference. All plans, schedules and reports that require DTSC's approval and are submitted by Proponent pursuant to this Agreement are incorporated in this Agreement upon DTSC's approval.

12. Reservation of Rights. DTSC reserves all of its statutory and regulatory powers, authorities, rights, and remedies under applicable laws to protect public health or the environment, including the right to recover its costs incurred therefor. Proponent reserves all of its statutory and regulatory rights, defenses and remedies available to the Proponent under applicable laws.

13. Non-Admission of Liability. By entering into this Agreement, Proponent does not admit to any finding of fact or conclusion of law set forth in this Agreement or any fault or liability under applicable laws.

14. Proponent Liabilities. Nothing in this Agreement shall constitute or be considered a covenant not to sue, release or satisfaction from liability by DTSC for any condition or claim arising as a result of Proponent's past, current, or future operations or ownership of the Site.

15. Government Liabilities. The State of California or DTSC shall not be liable for any injuries or damages to persons or property resulting from acts or omissions by the Proponent or by related parties in carrying out activities pursuant to this Agreement, nor shall the State of California or DTSC be held as a party to any contract entered into by

DRAFT

2220 - 4TH STREET
PEERLESS ELECTRIC
9/22/2002 - 9/22/2002

Proponent or its agents in carrying out the activities pursuant to this Agreement.

16. Third Party Actions. In the event that Proponent is a party to any suit or claim for damages or contribution relating to the Site to which DTSC is not a party, Proponent shall notify DTSC in writing within 10 days after service of the complaint in the third-party action. Proponent shall pay all costs incurred by DTSC relating to such third-party actions, including but not limited to responding to subpoenas.

17. California Law. This Agreement shall be governed, performed and interpreted under the laws of the State of California.

18. Severability. If any portion of this Agreement is ultimately determined not to be enforceable, that portion will be severed from the Agreement and the severability shall not affect the enforceability of the remaining provisions of the Agreement.

19. Parties Bound. This Agreement applies to and is binding, jointly and severally, upon Proponent and its agents, receivers, trustees, successors and assignees, and upon DTSC and any successor agency that may have responsibility for and jurisdiction over the subject matter of this Agreement. Proponent shall ensure that its contractors, subcontractors and agents receive a copy of this Agreement and comply with this Agreement.

20. Effective Date. The effective date of this Agreement is the date of signature by DTSC's authorized representative after this Agreement is first signed by Proponent's authorized representative. Except as otherwise specified, "days" means calendar days.

21. Representative Authority. Each undersigned representative of the party to this Agreement certifies that she or he is fully authorized to enter into the terms and conditions of this Agreement and to execute and legally bind the party to this Agreement.

22. Counterparts. This Agreement may be executed and delivered in any number of counterparts, each of which when executed and delivered shall be deemed to be an original, but such counterparts shall together constitute one and the same document.

PLATE 2

EXHIBIT C
SCOPE OF WORK

The following Tasks will be completed as part of this Agreement:

TASK 1.

Document Reviews. DTSC will review a Completion Report for Capping Embankment Soils and and Operations and Maintenance Plan and provide written comments to the Proponent.

TASK 2.

Operations and Maintenance (O&M). The Proponent shall comply with any and all operation and maintenance requirements in accordance with the final O&M Plan. If deemed necessary, DTSC will prepare and require Proponent to enter into an O&M Agreement with DTSC.

TASK 3.

Financial Assurance. Proponent shall establish and maintain a financial assurance mechanism pursuant to California Health and Safety Code section 25355.2 for implementing any required O&M activities, LUC-related activities, five-year review activities, and DTSC's costs incurred in overseeing these activities.

TASK 4.

Land Use Covenants. The parties agree that land use covenants (LUC) pursuant to California Code of Regulations, title 22, section 67391.1 are necessary to ensure full protection of the environment and human health. The Proponent agrees to sign and record the LUC approved by DTSC within ten (10) days of receipt of a fully executed original.

Dear Doug Herst:

I made edits to the agreement to add Herst Ventures, Inc. Also, please note that some additional tasks under the agreement have been added. These include reviewing a completion report for capping the embankment soils and an Operations and Maintenance Plan, and DTSC's time to prepare an Operations and Maintenance Plan Agreement. The cost estimate was adjusted to include these tasks.

Attached is the Voluntary Cleanup Agreement (VCA) and exhibits. Please print these up and return the original signed copy to me.

Hi Geoff,

I spoke with my supervisor about the Peerless Electric LUST case that you are handling. Since DTSC does not get involved with those types of cases, there is not much assistance with concurrent arrangements that we can make. However, I can cc you on written correspondence that we have with the responsible party (I will add you as a contact in our Envirostor Database).

Thank you,

Hello Tom,

Ms. Sunga suggested we get together to talk about how to handle cases in Berkeley that are both leaking tank cases and DTSC non-fuel cases.

We have three cases in Berkeley that DTSC is handling. 2366 San Pablo Avenue is a lead (Pb) case with petroleum products in soil and groundwater. Peerless is a pesticide case with an open LUST case (diesel). Aquatic Park Science Center is an open LUST case for mineral spirits.

We would like to work on resolving the cases concurrently or by some other arrangement. We are also concerned that the responsible parties may feel they have completed their projects upon DTSC certification, only to find out that they still have unresolved environmental issues.

It might also be worthwhile to involve the Regional Board.

Look forward to discussing these issues with you.

Lynne,

I don't think we have a copy. We could have a look at an electronic copy.

On another subject - Did you work on the Peerless case, accross the tracks? We are trying to reconcile cases in GeoTracker and was wondering if the DTSC certification is sufficient to also the leaking fuel tank (diesel) case?

Geoff -

I was on vacation last week and just wanted to follow up to make sure you received a copy of the Draft PEA Report for the Aquatic Park Science Center.

Mark Piros and Medi Sunga at DTSC are planning on providing comments by the first week of May. I hope that fits into your schedule as well.

If you have any questions, please do not hesitate to contact me.

From: "Alexander, Jeriann [FWI]"
To: "Karen Toth (E-mail)"
Date: 1/9/2008 1:26 PM
Subject: Peerless Electric

Hi Karen,
As we discussed on Monday, we understand that the DTSC has approved moving forward with placing a shotcrete type cap over the embankment area which exists behind the Peerless property, as a temporary remedial action. The embankment area is not owned by Peerless, the owner is Union Pacific railroad Company. Further we understand that the DTSC will impose a deed restriction or land use restriction on the 2220 Fourth Street Property.

I am assuming that the DTSC will articulate this information in a formal letter at the point in time that the deed restriction is filed. We believe this letter is a necessary requirement for the permitting process with the railroad to proceed.

Re: Waste Water and Slurry Mitigation Plan

DRAFT

Meridith:

I have put together a plan for controlling the waste water and slurry generated by Counter/Production. I have gone over this plan with all the employees and have complete confidence that the procedures we have established will be followed without exception. I will have all the employees sign the Plan and I will keep them on file.

All of the short-term components contained within the plan are in place, with the exception of the secondary supernatant storage container, and the 3-sided dam for the storm drain. We have some long-term goals that I have included below with anticipated completion dates.

I am confident that we have a workable, thoroughly examined procedure in place that will allow us to control the waste water and slurry on our site, and prevent discharge off of the site. After completion of all of the tasks listed below we will be able to minimize storm water infiltration into our collection system.

TASK	ANTICIPATED COMPLETION DATE
Secondary supernatant vessel	June 15, 2001
"U" dam for storm drain	June 15, 2001
Fix roof gutter	August, 2001
Re-direct roof downspout	August, 2001
Cover sludge pit	August, 2001
Awning roof/ West face	September, 2001
Awning roof/ South pad area	October, 2001

Sincerely,

Don McPherson

WASTE WATER AND SLURRY MITIGATION PLAN [Rev. 0]

OBJECTIVE

To establish and implement a system wherein waste materials in the form of glass powder slurry and high pH water is controlled and collected, and prevented from entering the storm drain system.

HISTORICAL OVERVIEW

Counter/Production manufactures a 80-95% recycled glass product producing tables, floors, bowls, countertops, etc. During fabrication steps a slurry of finely divided glass suspended in water is generated. The slurry undergoes a rapid rise in pH due to an ion-exchange of the hydroxyl ion with the alkali ion in the glass structure.

In late 2000 Counter/Production began implementing a procedure for controlling and collecting this slurry and supernatant. This consists of a dam along the perimeter of the property to prevent leakage onto the train right-of-way, and a French drain connected to a sludge pit, with a slurry/supernatant bag-based separation system. Additionally there is a pump and pipe system that carries slurry directly from the grinding table to the sludge pit, (the grinding table generates a majority of the slurry). The dried sludge is land-filled, and until recently the supernatant was discharged into the sanitary sewer.

The supernatant is now being directed to a storage tank and used under pressure to wash down the shop work areas. This water flows back into the French drain and the slurry pit. The storm drain lid has been sealed top and bottom with a sticky-backed tar-based material. Six 1.5" diameter holes have been opened through this covering allowing us to control by the use of plugs the flow of water into the storm drain system.

ONGOING MITIGATION PROCEDURE

[THIS PROCEDURE MUST BE FOLLOWED BY ALL COUNTER/PRODUCTION EMPLOYEES]

0. The objective of following these procedures is to ensure that waste water generated at counter/Production is controlled and collected and prevented from entering the storm water system, which flows into the San Francisco Bay.
1. Everyday all work areas will be hosed down. The slurry byproduct will be washed into the French drain, (connected to the sludge pit).
2. The sludge pit must be kept from overloading. The submerged pump must be turned on to pump slurry into the bag separation system.
3. Each morning the bag must be checked. If it is more than 50% full it needs to be changed out for a fresh collection bag. The collected sludge is to be placed into the dumpster.
4. The storm drain, located next to the grinding table, will be kept free of standing water and slurry. It has six 1.5" diameter holes with cork plugs. These plugs must be in place if there is any work underway that is causing slurry of water to accumulate at the storm drain.
5. In the event of rain, the plugs must be removed and the 3-sided dam placed in a "U" around the drain, to prevent material from the shop mixing with and entering the storm drain system.

DRAFT

6. The water and slurry that accumulates at the storm drain cover must be diligently collected with the shop vacuum as soon as possible. In no case should any water or slurry be allowed to remain uncollected overnight.
7. All hand-work operations that generate slurry must be performed away from the storm drain, and must be performed such that the slurry can easily be washed down into the French drain.

I have read this procedure and understand that I must follow the operational protocols outlined herein.

INSPECTION FORM

Facility Name: Counter Productions Date: 4/19/01 Page: 1 of 1
Address: 701 Bancroft Contact: Dan McPherson
Phone: 843-6916

Notice to Comply: Toxics Management Division (TMD) observed water being discharged from the site. pH of water was approximately 11. Nothing other than stormwater may enter the storm drain system (Berkeley Municipal Code 6.2.16). Future penalties up to $10,000 per day may result.

Write a procedure for protecting the storm drain when pressure washing. Retrain employees on stormwater best management practices. Provide proof that you have done so by 5/19/01.

High pH water has been discharged to Bancroft. Water must be shop-vacuumed up and disposed of in the sanitary sewer or in the pit. Clean-up must be completed by tonight (5pm). TMD will reinspect tomorrow.

Re: Corrective Action Steps for Counter/Production Workshop

Dear Ms. Lear:

On November 3, 2000, Counter/Production was inspected by the Toxics Management Division of the Department of Planning of the City of Berkeley. The problem identified by the inspector was a deposit of slurry alongside the railroad tracks to the west of the Counter/Production workshop. The required remedy was listed as follows: 1. Slurry material to be drummed by 5pm on 11/6/00. 2. Corrective Action Plan to be submitted to the Toxics Department by 11/13/00. 3. Waste profiled and disposed by 12/3/00.
The following actions have been taken by Counter/Production in response to the requirements.

1. Slurry material to be drummed by 5pm on 11/6/00. The slurry material was removed and placed into drums by this date. The drums are stored on the Counter/Production site.

2. Corrective Action Plan to be submitted to the Toxics Department by 11/13/00. The proposed Corrective Action Plan is attached to this letter.

3. Waste profiled and disposed by 12/3/00. Counter/Production has engaged the firm of Curtis & Tompkins to test and profile the slurry/soil in the drums.

Please review the attached Corrective Action Plan and call if you have any questions or comments. Sincerely,

Bruce Brubaker
Partner

www.counter-production.com

the Radial Arm Polisher into drums on our property. After settlement the clear water is disposed of into the sanitary sewer.

5B. Description of Long-term Corrective Action.

Our proposal is to dig a slurry pit at the lowest elevation point along the western edge. This pit will capture all slurry generated from our processes. Water effluent will be pumped from the pit to a bag filter system, in which the effluent passes through a fine mesh bag. The filtered water will be recycled or if necessary, disposed of in the sanitary sewer. Solids from the slurry pit, and the filter bags, when filled, will be disposed of as solid waste.

6. Schedule of Remedy.

The interim corrective action plan is already in place. As mentioned above, the curb has already been installed. We are currently using the drum capturing system. The schedule of the long-term corrective action plan is as follows: 1) the slurry pit will be finished by December 31; and 2) The bag filter unit is a special order item, and it will be 10-16 weeks before this unit will be in place. We expect the system to be operating 2 weeks after the filter unit is on site.

CERTIFICATION OF RETURN TO COMPLIANCE

Date: 12/2/16

Owner/Operator: Lee Miller

Facility Name: _____

Address: 701 Bancroft Way Zip Code: 94710

In the matter of the Violation(s) cited on the Hazardous Materials Inspection and Violation Report and/or the Stormwater Facility Inspection Report issued:

On: 10-14-16 (Date) By: Jewel Mauricio jmauricio@cityofberkeley.info (Inspector)

I certify under penalty of law that:

YES	N/A	
☒	☐	The violation(s) specified on the Hazardous Materials Inspection and Violation Report have been corrected and any required supporting documentation is attached (e.g. photos, copies of manifests/disposal receipts, or other original paperwork).
☐	☒	The violation(s) specified on the Stormwater Facility Inspection Report Form were corrected on the following date: _____.
☐	☒	Other: (Use the lines below to make your comments)

I have personally examined and am familiar with the information submitted and believe the information is true, accurate and complete. I am authorized to file this certification for the facility. I am aware that there are significant penalties for submitting false information and/or for non-compliance with the violations noted, including the possibility of fines and imprisonment.

Name: Lee Miller Title: Owner

Signature: [signature] Date Signed: 12/2/16

Failure to submit this Certification within the time specified on the Hazardous Materials Inspection and Violation Report and the Stormwater Facility Inspection Report Form may result in a re-inspection of the facility, to be charged at an hourly rate and fines up to $25,000 per day of non-compliance (HSC Sections 25188 & 25514 and BMC Section 17.20.160).

FEE APPEAL FORM

Applicant Name	lee miltier		
Business Name	lee miltier		
Business Address	701 bancroft way		
Owner Name	lee miltier		
Applicant Phone	510 649 1977		
Disputed Fee Amount	1995	**Customer ID No.**	123028

State the fee that you are appealing and your reasons for the appeal. You may attach additional pages to this form if you need more writing space. You are encouraged to attach documented evidence with your submittal.

Hello,

This business is anti-profit (can't afford to become officially non-profit) so i really can't afford this fee.
Jewel was pretty helpful with filling out forms, but now that i got this bill and spoke to Paul in your office, I see that i can and should just get rid of extra propane tanks that are sitting around empty (immediately) and switch to a smaller oxygen tank (next week) so i can get below the 200 cubic foot threshold.
I sure would have done this last year if it was clear. It also seems unfair to charge for previous years.

I hope that a conversation about this makes it clear that I'm not just cheap, I'm poor. If that matters.

Thank you!

Subject: RE: Fee Appeal

Ok, Lee Miltier was charged on 4/24/17 for 3 years (FY 15, 16 and 17) at HMPA2, totaling $1995. He was then billed during the annual billing for FY18 at HMPA1 for $364.

Should he receive credit for all previous years, or just FY 15 and 16? I think I need documentation for any credit that I will be sending to Finance, so if possible I need the signed fee appeal form indicating it was approved along with the amount and details of the credit to be issued. Thanks.

Hello Meredith!

Acetylene is gone (used it once in twenty years), will change the map. Photosynthesis no longer exists. That is why i listed the business as myself. Is there some other thing i have to do regarding that?

On Wed, Jun 21, 2017 at 2:13 PM, Lear, Meridith <MLear@cityofberkeley.info> wrote:

> Hi Mr. Miltier, I went into the system and reviewed your submittals today. There were a couple of issues and so you will see the submittal was declined. First issue is that your name is listed as the facility name when it should be "Photosynthesis". This needs to be corrected under the Business Activities Facility Name section. Secondly your map has acetylene on it, but there isn't any acetylene reported on the inventory. Can you please confirm in this email that you no longer have acetylene so we can get your fee appeal moving? And then, please go back into CERS and submit a new map without the acetylene. If you do have acetylene, you will need to add it to the hazardous materials inventory and resubmit the inventory.

DRAFT

So my total current gas storage is less than 999 cu/ft.

AND, it has been that for many years. I really only use/need these few tanks. This whole thing is because i had empty tanks given to me that i figured i would keep around if i needed them. This has been nothing but miscommunication, misunderstanding, and bad arithmetic.

I can afford $315/year, but certainly would appreciate not getting billed for the past. I hope this is possible.

Thank you!

Lee

RE: 705 Bancroft Way, Berkeley
Workplan for Soils Remediation

Dear Mr. Takenouchi:

Following the meeting at the City of Berkeley with the Toxic Management Program and the Regional Water Quality Control Board, the following has been agreed:

1. Excavation of pollutants can commence in all areas where hazardous waste levels were found on the above site.

2. A study of the possible existence of a perched zone should be done and agreement reached with the RWQCB and City personnel. See note (f) below.

3. If significant pollution levels (above background but below TLC and TTLC) are to be left in place on site - a deed notification shall be filed by the owners. The owners will also provide oversight fees and four weeks of notice for a toxicologist to review the pollution levels and the parameters for future use of the site. Enclosed are examples of language used by the State for metal pollutants left in place and City notification for petroleum hydrocarbons left in place. Background levels established by the RWQCB or other City sites shall be used.

4. If pollution above background is not left in place, no notification or toxicological studies need be considered.

DRAFT

In addition to the above, the City and the RWQCB require the following:

a. The City of Berkeley Engineering Department should be contacted for compaction tests and other engineering requirements.

b. If screening of the soils samples and removal of metallic sputter fragments is to occur, a written rationale should be provided and approval received from the City.

c. Hydrogen ion concentration should be confirmed at the bottom samples of the excavations.

d. Two days notice should be provided to the Toxic Management Program inspector to witness the sampling.

e. The fees for City of Berkeley oversight should be paid immediately. This includes $260.00 for reviewing the workplan, ten hours for the various meeting and site visits at $65.00, plus an additional $260.00 for the closure. If the time to oversee the project varies substantially, the City will send additional billings.

f. The consultants should provide a registered professional to interpret the groundwater data.

g. For all outdoors work, dust supression measure are to be implemented.

Should you require further assistance, please call Nabil Al-Hadithy at (510) 644-7719.

Sincerely,

Denise Barndt
Emergency & Toxics Coordinator

RE: SITE CLOSURE
DELICORE INC.,
705 BANCROFT WAY, BERKELEY, CA

Dear Mr. Sisich:

The above-referenced site was considered for closure in a letter dated December 4, 1991, and sent to the Regional Water Quality Control Board (RWQCB). In a meeting with RWQCB on December 16, 1991, the following site-specific issues were raised to be resolved before any approval for site-closure can be granted.

1. What is the depth to ground water?

2. Is there a permeable layer 5 feet thick or greater between the ground water and deepest soil contamination?

3. Where are the on-site storage and handling facilities for waste oil, lubricating oil, solvents, and spent batteries?

Please provide this office with a written response to the above questions within thirty (30) days of the recipt of this letter.

If you have any questions regarding these matters, please contact

RE: SECOND NOTICE 705 Bancroft Way, Berkeley
Soils Remediation and Possible Impact of Pollutants on Groundwater

Dear Mr. Takenouchi:

The City of Berkeley Toxics Program has not received the revised workplan that was due at the end of December 1993. The City of Berkeley requires that the workplan be amended as instructed in our letter on the November 23, 1993. The revised plan is to be submitted within ten days from the date of this letter. If the revised workplan is acceptable, the sampling and analyses should start immediately. If all the above is not addressed within the timeline presented, the City will request the intervention of Mr. Gilbert Jensen of the Alameda County District Attorney's office.

Should you require further assistance, please call Nabil Al-Hadithy at (510) 644 7719.

Sincerely,

Denise Barndt

re: **705 Bancroft Way, Berkeley**

Dear Mr. Sisich:

The City of Berkeley Toxics Program has received the May 26, 2993 Report to FVA/Delicor Inc. on Review of Site History and Previous Investigations, Additional Investigations, and Remedial Activities submitted by Dennis Bates Associates for the above referenced site. The report asks for regulatory "closure" for the site. This letter contains our findings on this subject. First, however, the report does not follow the typical format for site closure, as recommended by the RWQCB. Second, the report included no tables compiling the lab reports, nor figures showing the distribution of pollutants in soils or groundwater. As a result, a greater number of staff hours were necessary to review the report.

Technical Comments:

The groundwater samples collected were not analyzed for all constituents listed in the work plan. The explanation for this presented in the report was that "the City of Berkeley required that piezometers be removed within two days..." (p. 9) This is not a City of Berkeley policy. This statement may be a reflection of the following: The City of Berkeley issues permits for monitor well construction. Currently such permits are not required for grab groundwater sampling points, e.g. temporary piezometers. Jennifer Krebs has no memory of stating that piezometers should be removed after two days: only that the issue of a grab groundwater sampling point/monitor well became muddled if sampling/recovery was a multi-day process rather than a quick drill and grab. She deferred to John Sammons professional judgement as to how the sampling should be conducted.

The groundwater sampling suite was not as exhaustive as proposed in the work plan. However, in the five temporary well points installed over the past two years,

DRAFT

no TPHg, TPHd, or BTEX has been detected. No pesticides (8080 analysis) were detected. TCE was detected in two groundwater samples taken in January 1993: one sampling point was on the eastern edge of the property; the other point was along the northern edge of the property. Zinc was found in all four sampling points from January 1993. It was highest in P-4, outside the current warehouse building. 80 ppb of arsenic was also detected in point P-4; this level is above the MCL of 50 ppb.

After discussion with the RWQCB, it was determined that "closure" could not be issued without further understanding of the presence of arsenic in groundwater. Please provide us with an addendum to the report that discusses possible sources, on or offsite for the arsenic, and the likelihood of the polluted groundwater affecting the bay.

The report has no explanation for why the entire analytical suite proposed for soil samples in the workplan was not carried out. Presumably the composite samples were taken from hot spots (including metals and hydrocarbons) in the stockpiles. (No explanation/figure could be found showing the sample locations.) Total recoverable petroleum hydrocarbons was found in one sidewall sample at 1100 ppm. TPHd was detected in many sidewall samples at levels under 20 parts per million.

Conclusions:

Foundry sands are still present beneath the warehouse. Metals above background levels were and may be present in soils outside the foundry building. The underground fuel tank on-site did not seem to be a source of groundwater pollution. Some petroleum hydrocarbon polluted soils have been removed: some remain. After an addendum to the May 26, 1993 report has been submitted that addresses the arsenic issue, the City of Berkeley will consider recommending "no further action to the RWQCB." The closure letter may require a deed notice be placed on the property: this notice will state that metals above background levels remain on-site and that future site uses take this into account.

Second Notice of Violation: Failure to Respond to Hazardous Materials Storage Reporting Requirements at 705 Bancroft Way Berkeley, CA 94710. Correction due by February 27, 2017.

Dear Berkeley Business Owner/Operator,

Toxics Management Division (TMD) has determined that your facility is storing or using hazardous materials in quantities that require reporting under fire and hazardous materials regulations.

TMD is required to collect information on the types and quantities of hazardous materials and hazardous wastes used, stored or generated within the City's jurisdiction. To satisfy these requirements, all facilities that generate **any** quantity of hazardous materials must complete a *Hazardous Materials Business plan*. Facilities that use or store **aggregate** quantities of hazardous materials (including hazardous wastes) equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases are required to electronically submit a *Hazardous Materials Business Plan (HMBP)* through http://cers.calepa.ca.gov/. **Please note, hazardous materials include less dangerous materials such as cylinders of carbon dioxide, oxygen, and nitrogen as well as paint, oil (cooking oil), and parts cleaner.** This information must be submitted at the time a facility begins operations, or at the time it first begins to handle a hazardous material or waste that meets the above thresholds.

A first Notice of Violation was issued on November 16, 2016 for failure to submit the HMBP. This letter serves as a **Second Notice of Violation** and requires that you submit the forms to TMD by **February 27, 2017**. If TMD does not receive your submittal by **February 27, 2017,** you will be fined a late filing fee in accordance with the approved fee schedule for TMD. The fee schedule can be found at "Downloads" on TMD's website: http://www.cityofberkeley.info/toxics. In addition, non-compliance with hazardous materials reporting requirements of Section 25514 (a), Chapter 6.95 of Division 20 of the California Health and Safety Code is a violation and can result in fines of **$2,000 fine per day**.

TMD is the Certified Unified Program Agency (CUPA) for the City of Berkeley. We are authorized to implement Chapters 6.5, 6.7, 6.75, 6.95, and Division 20 of the State Health and Safety Code in addition to the City ordinances. If you have questions about these requirements, please call (510) 981-7460 and ask to speak with a Hazardous Materials Specialist.

Sincerely,

Subject: Recommendation for Case Closure, 705 Bancroft Way, Berkeley, CA

Gentlemen:

This letter request for site closure at the above listed subject site has been prepared by Dennis Bates Associates, Inc. (DBA), to provide a summary of work that has been done at the site.

The previous site contractor, Miller Environmental Company (MEC) is no longer in business and DBA was unable to access their files. Information concerning work completed by MEC discussed in this document has been obtained from FVA/Delicor and from computer diskettes provided to DBA by MEC prior to their closing.

We believe that the information presented herein will allow you to decide, based on the merits of the investigation and the data presented, that the site is an appropriate candidate for closure with no further action required on the part of FVA/Delicor.

We further believe that the management of FVA/Delicor has been conscientious in their effort to fully comply with remediation guidelines as required by the City of Berkeley and the SFBRWQCB.

Please address all correspondence to Mr. Wataru Takenouchi, President, FVA/Delicor at 2200 Powell Street, Suite 1240, Emeryville, CA 94608 and to Dennis Bates Associates, Inc., 2011 Feliz Road, Novato, CA 94945-1702.

INTRODUCTION

This document provides a summary of previous investigative and remedial work at the 705 Bancroft Way, Berkeley site and presents Dennis Bates Associates, Inc. (DBA) recommendations for a no further action closure for the site.

This document includes a summary review of previous work done by Miller Environmental Company (MEC) and DBA for FVA/Delicor, 2000 Powell Street, Suite 1240, Emeryville, CA 94608 and a reference and summary of work done by by Subsurface Consultants Inc. (SCI) for Peerless Lighting, 2246 Fifth Street, Berkeley, CA 94702, relative to the 705 Bancroft Way site..

MEC's involvement at the site encompassed the removal of one 5000-gallon underground storage tank (UST), the preparation of a Phase I Assessment, the installation of three borings to groundwater and the collection of groundwater samples by the hydropunch method and the investigation and evaluation of possible foundry waste material and petroleum hydrocarbons beneath the cement slab floor of Building 3.

DBA's involvement has been to excavate, stockpile, characterize and appropriately dispose of the petroleum hydrocarbon impacted soil in the vicinity of Building 3 and to install four temporary piezometers to determine the groundwater flow direction beneath Building 3. At the request of the City of Berkeley and the San Francisco Regional Water Quality Control Board (SFBRWQCB), an additional piezometer was located immediately to the west of Building 4 and Total Petroleum Hydrocarbons as Diesel (TPHd) was added to the analytical suite. DBA was to prepare a report to FVA\Delicor and the appropriate regulatory agencies providing the analytical data obtained as well as our recommendations.

SCI's work at the site was limited to the preparation of a Preliminary Environmental Assessment. No! analyze!

For ease of reference all DBA Plates are attached as Appendix A and Tabular data is located in Appendix B. MEC Plates are attached as Appendix C and MEC tabular data is in Appendix D. Copies of all available laboratory data, MEC and DBA, are in Appendix E.

SITE LOCATION AND DESCRIPTION

The subject property is located at 705 Bancroft Way in Berkeley, California. The property measures approximately one acre, or about 43,000 square feet and is situated near the western border of Berkeley in an area of mixed commercial, residential, and industrial properties. The Berkeley Aquatic Park is the nearest surface water body, situated approximately 1/4-mile west of the site. The San Francisco Bay is located about one-mile to the west of the site. The site is bounded by buildings to the north and east, railroad tracks to the west, and Bancroft Way to the south. A site location map is shown on DBA Plate 1, Appendix A.

DRAFT

PRIOR SITE USE

From the 1930's until the late 1950's, according to MEC and SCI, a culvert and corrugated building manufacturer (Cal Co), owned the property. A small foundry was also located on the property while Cal Co. owned the property. This foundry was located inside of Building 3. The owner recalled that most of the floor of the warehouse was concrete except for a dirt strip going down the middle of the building. It was in this area where the molten metal was poured into the 'molds'. It can be assumed that the foundry was in operation from the time the warehouse was erected until the property was purchased by the Stadelhofer family at the end of the 1950's.

No further data could be obtained regarding the existence or status of the foundry. A review of aerial photographs showed no obvious signs of a foundry; i.e. no piles of slag were observed in any of the aerial photographs.

The Stadelhofer family purchased the property for business income, renting the premises to various tenants who used the property for newspaper storage, printing, automobile restoration and pump repair.

The most recent occupant of the site was FVA/Delicor, a vending machine sales and service company. Five separate buildings on the property were utilized by Delicor in conducting their business. The buildings housed: a vending machine and parts storeroom, a warehouse (used for storing food and for parking delivery trucks), a building containing refrigerators storing perishable foods, a truck maintenance building and an office building and vending machine repair shop. Other than building coverage the site was surfaced with concrete, asphalt, or aggregate concrete. Site Map - DBA Plate 2, Appendix A.

Delicor installed a 5,000-gallon underground storage tank in 1984 to store unleaded gasoline for the company vehicles. The tank was permitted and inspected by the Berkeley Fire Department and is the only known underground storage tank to have been used at the 705 Bancroft Way site. MEC Plate 2, Appendix C.

In 1991 FVA/Delicor (seller) entered into a Real Estate transaction with Peerless (buyer) to purchase the 705 Bancroft Way site. Completion of the transaction is pending.

Since Delicor vacated the premises the buildings described above have remained vacant.

REVIEW OF ENVIRONMENTAL INVESTIGATIONS

September 1991 Miller Environmental

A permit for tank removal was issued to Miller Environmental Company, Inc. by the Berkeley Health Department. One 5000-gallon UST, installed by Delicor and used to store gasoline fuel, was removed. Soil samples collected by MEC personnel following removal of the UST contained

ENV.

DRAFT

no detectable levels of hydrocarbon contamination. The tank was properly manifested and disposed of by H & H Ship Service Company and Levin Metals Corporation.

October 1991 Miller Environmental
MEC performed a walk-through site inspection for the purpose of site description and observation of site activities. Waste disposal locations and potential problem areas were identified. While a history of site use and routine waste storage within the confines of the buildings and yard was compiled during the Phase I inspection, no significant hazardous conditions were observed.

November 1991 Miller Environmental
The Phase I Report by MEC (dated 11/07/91) included a review of records of Underground Storage Tank Releases at the Regional Water Quality Control Board (RWQCB) office in Oakland. Within those records, thirteen cases were identified within a 1/2-mile radius of the subject site. The nearest property with a 'case file' was adjacent to the Delicor property and owned by, Peerless Lighting. Although a file had been prepared by the RWQCB no detailed records were available regarding any unauthorized release from the two Peerless addresses on file.

January 1992 Subsurface Consultants, Inc.
Subsurface Consultants, Inc. (SCI), as contractors for Peerless, reviewed the work done by MEC and performed additional research and studies that they considered to be necessary to characterize environmental conditions existing at the site. This additional work included the drilling and sampling of 18 test borings. Selected soil and groundwater samples were analyzed for various contaminants. In their conclusions and recommendations SCI listed three environmental concerns that would require further study and remediation. These three concerns were: foundry wastes, oil and grease contamination and possible ground water contamination.

April 1992 Miller Environmental
Because low levels of benzene were detected in the spoils pile, the City of Berkeley and the SFBRWQCB recommended the collection of water samples downgradient from the former UST.

A workplan for three soil borings and collection of water samples utilizing hydropunch methodology was approved by the City of Berkeley.

Laboratory analysis results from the MEC investigation indicated that there was no petroleum hydrocarbon impaction to either the soil or groundwater in the vicinity of the former UST site.

September 1992 Miller Environmental
With the concurrence of the City of Berkeley and the SFBRWQCB, MEC was authorized by FVA/Delicor to perform additional studies beneath Building 3 to: determine the areal extent and depth of foundry wastes, characterize the foundry wastes and obtain a detailed description of the shallow sub-surface geology beneath the building. MEC descriptive Plates can be found in Appendix C, MEC Tabular Data in Appendix D and copies of available MEC laboratory data in Appendix E.

A

January 1993 Dennis Bates Associates

In January of 1993 FVA/Delicor contracted with Dennis Bates Associates, Inc. (DBA) for additional investigative and remedial work at the Site. The work, done by DBA during January, February and March of 1993, included the excavation and disposal of the hydrocarbon impacted soil known to be present near the former compressor area. In addition soil borings were completed and water samples collected to evaluate possible groundwater contamination. Since the location of the former UST had been evaluated by MEC, this area was not included in the DBA scope of work.

N.A.

Where is SCI soil analyses?

SUMMARY OF FINDINGS - MILLER ENVIRONMENTAL

No petroleum hydrocarbons remain in the soil and groundwater in the vicinity of the former UST site.

Foundry material exists beneath the slab floor of Building 3 ranging in depth from four to forty two inches below the bottom of the slab. MEC Plate 6, Appendix C.

The location of foundry material at the site is almost completely beneath a structurally sound building and is covered to a depth of 6 inches by a reinforced concrete floor.

TTLC and/or STLC limits for Copper, Lead or Zinc were not exceeded in any composited or grab samples obtained from the subsurface material. MEC Tables 1 and 2, Appendix D.

Total Oil and Grease results from the 4 to 4.5 foot depth beneath Building 3 ranged from 10 to 90 ppm. MEC Table 3, Appendix D.

Evidence from the borings at the site suggest that a significant thickness (12-18 feet) of Bay Mud and (where both are encounted) the Temescal formation, tend to form at least locally, barriers which separate the foundry material from the water bearing zone known to be present at 19 feet below grade. If such is the case, these predominantly clay soil types serve as a permeability barrier to preventing further downward migration of metals towards the groundwater. MEC Plates 4, 5 and 7, Appendix D.

The analytical and geological data developed during the September 1992 MEC investigation resulted in the recommendation that no removal/remedial activities were necessary or required for soil in the portion of the Site beneath Building 3.

SUMMARY OF FINDINGS - DENNIS BATES ASSOCIATES

Soil Excavation and Disposal

The excavation and disposal of the heavy hydrocarbon impacted soil between buildings 3, 4 and the adjacent Peerless building adequately remediated this portion of the site. DBA excavated about 110 cubic yards of soil from this area. Composite analyses indicated that one 50-cubic yard unit

DRAFT

of the soil contained 420,000 micrograms per gram (parts per billion) of Total Recoverable Petroleum Hydrocarbons (TRPH). Analysis of the second 50-cubic yard unit indicated the presence of TRPH at 660,000 micrograms per gram (parts per billion). Four discrete samples representing 100 cubic yards of this stockpiled soil was analyzed for the CAM 17 metals. None of the 17 metals was above the established TTLC's. This soil was transported to REMCO of Richmond, CA for recycling. DBA Plates 3 and 4, Appendix A and DBA Table 1, Appendix B.

Four samples were collected from the bottom of the excavation and analyzed for TRPH. TRPH was not detected in any of these samples at or above the reporting limit of 50 mg/kg. Analysis of these same samples for Total Petroleum Hydrocarbons as Diesel (TPHd) found diesel range hydrocarbons in amounts ranging from Non-Detect to 14 mg/kg. DBA Plate 3, Appendix A and DBA Table 2, Appendix B.

Eight sidewall samples were taken from the excavation and analyzed for TRPH and TPHd. Only one of the sidewall samples, obtained from beneath the footings of the adjacent building, contained TRPH at 1100 mg/kg. TPHd analysis indicated the presence of diesel range hydrocarbons in amounts ranging from Non-Detect to 8.7 mg/kg. DBA Plate 3, Appendix A and DBA Table 3, Appendix B.

Based on these analyses DBA concluded that the area impacted by the heavy hydrocarbons had been remediated and that no further remedial action was required. The location where the 1100 mg/kg of TRPH was detected contained only 1.3 mg/kg of TPHd and was located beneath the footings of the adjacent building.

After the samples had been obtained the excavation was backfilled with imported 'road-base' material and compacted in two foot lifts to grade. Compaction was attained by using a 'sheeps foot' compactor.

DRAFT

Installation of Piezometers and Groundwater Sampling

Four temporary piezometers were installed to a depth of 25 feet with five feet of screen. The well locations had been previously surveyed by a California Licensed Land Surveyor to determine the elevation of the concrete surface above mean sea level. The geology encountered during installation corresponded to the geology reported by MEC in its reports dealing with the groundwater survey in the area where the underground tank had been removed and in its later characterization of the area beneath Building 3. DBA Plate 5, Appendix A.

Groundwater Gradient

The depth to groundwater was recorded at 30 minutes after installation and again at 24 hours after installation and the direction of groundwater flow at the Site was calculated by using a planar solution for the calculations.

The direction of gradient direction for each of the triangles is shown below.

TRIANGLE	GRADIENT	DIRECTION
P1-P2-P3	260 Degrees	WEST SOUTHWEST
P2-P3-P4	85 Degrees	EAST NORTHEAST
P1-P2-P4	293 Degrees	WEST NORTHWEST
P1-P3-P4	42 Degrees	NORTH NORTHEAST

These gradients were based upon a single groundwater measurement in each well and indicate a multi-directional groundwater flow beneath the site and possible groundwater 'ponding' at shallow depth to the east of wells P2 and P4. DBA Plates 5A, 5B, 5C and 5D, Appendix A.

The gradient determined using P1-P2-P4 probably is the best representation of the reported regional gradient. DBA Plate 5C, Appendix A.

Groundwater Sampling

After installation, the piezometers were allowed to stabilize for 24 hours prior to sample collection. Each well was then purged of about four wetted well volumes of water and allowed to recover to 80 percent. The only temporary well that recovered to 80 percent on the day that it was purged was P4. Temporary well P1 did not recover to 80 percent until 48 hours had elapsed. Groundwater samples were collected from the temporary piezometers using 3/4 inch diameter disposable bailers.

The analytical suite originally selected for this site was for the groundwater to be analalyzed for TPHg with BTEX, TPHd, TRPH, Pesticides and Polychlorinated Biphenyls, Halogenated Volatile Organics and CAM 17 Metals. Since this analytical suite required the collection of a minimum of 4 liters of groundwater from each sampling point. It became obvious during the purging of the temporary wells that it would not be possible to obtain an adequate amount of groundwater from the wells to run the entire analytical suite on each well. Since these temporary wells were not completed in such a manner to preclude contaminants entering the annular space from the surface or shallower sub-surface areas it was not considered prudent to leave the casings in place for an extended period of time. Consequently, given the poor recovery rate and based on previous site work, DBA made the decision was made to modify the suite as shown below in order to obtain the best data from each location.

DRAFT

ANALYSIS	P1	P2	P3	P4
TPHd	X		X	
TPHg/BTEX			X	X
TRPH			X	
8010	X	X	X	X
8080	X	X		
CAM 17 Metals	X	X	X	X

Groundwater was encountered at 18 to 20 feet below grade in all four borings.

No detectable hydrocarbons as TRPH, TPHd, TPHg or BTEX were found in any of the groundwater samples analyzed.

No Organochlorine and other Organohalide Pesticides and Polychlorinated Biphenyls were detected in any of the groundwater samples analyzed by EPA Method 8080.

Groundwater from all four locations was analyzed for Halogenated Volatile Organics using EPA Method 8010. Trichloroethene at 1.3 micrograms per liter (ppb) was detected in P1 and at 1.5 ppb in P4. No other halogenated volatile organics were detected.

Groundwater from all four temporary piezometers was analyzed for CAM 17 Metals. Arsenic was found at 80.00 ppb in P4 and at 6.0 ppb in P3. Beryllium was found at 6.0 parts per billion in P1 and at 7.7 ppb in P4. Zinc was detected at 62.00 ppb in P1, at 79.00 ppb in P2, at 59.00 ppb in P3 and 160.00 parts ppb in P4. No other of the CAM 17 Metals were detected in any of the four groundwater samples analyzed.

DBA Tables 1 through 9, Appendix B present the analytical data in summary form.

<u>Arsenic in Groundwater</u>

The only compound detected in any of the analyses done that is of any regulatory concern is the Arsenic found in P4 which exceeds the established 50 ppb Maximum Contaminant Level of 30 ppb. This result was obtained from a single grab groundwater sample.

The STLC for Arsenic is 5.0 mg/l (parts per million); the STLC for Beryllium is 0.75 mg/l (parts per million) and the STLC for Zinc is 250 mg/l (parts per million).

DBA researched the available files at the San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) specifically for those cases where Arsenic was suspected or known to be present in the groundwater.

DRAFT

Only one site was discovered where Arsenic had been detected in groundwater. At this site in Emeryville Arsenic was detected in two upgradient wells, the predominant groundwater flow being South Southwest, at concentrations ranging from non-detect to 100 parts per billion (ppb). The wells where the 100 ppb concentrations were detected had been sampled only one other time when the analysis for Arsenic was not requested. The assumption put forward in this report was that, because the wells were located upgradient, the Arsenic was from an off site; perhaps by sub-crop penetration from 'feathered' edges of on-lapping upgradient fill material.

The Arsenic detected at 80 ppb in the groundwater at the FVA/Delicor site was found only in groundwater from sampling point P-4. Arsenic was found in only one other sampling point (P-3) at 6.0 ppb.

Although the direction of groundwater flow at the Delicor Site is somewhat confused, when the flow is determined using temporary wells P-1, P-2 and P-4, DBA Plate 5C, Appendix A, the flow is generally towards the Northwest which corresponds with the flows reported at other sites in the vicinity. Temporary well P-4 was considered to be the upgradient sampling point for this investigation.

Arsenates and Arsenites are used as insecticides, herbicides, larvicides and pesticides. Other arsenic compounds are used in the manufacture of pharmaceuticals, in pigment production, the manufacture of glass, textile printing, tanning, taxidermy and antifouling paints.

There is no history of any operation that used arsenic compounds on the FVA\Delicor site.

Another factor mitigating against the source of arsenic being on site is the fact that groundwater, at this site is beneath a Bay Mud and Temescal Formation. Arsenic was not detected in any of two of the monitoring points, P-1 and P-2, with P-1 being roughly downgradient from P-4. This indicates that the metal is not moving through groundwater and/or significant attenuation of the metal is occurring between P-4 and P-1.

It is very likely that the metal concentrations in the emergent groundwater into the Berkeley Aquatic Park and the Bay mudflats will be significantly less than the 80 ppb detected in P-4. This is based on the assumption that the well concentration would be diluted by at least a factor of 10 during the transport and emergence process. This dilution factor of 10 is conservative, but appropriate, because the initial contact with benthic organisms will occur in the interstitial waters of the Aquatic Park and mudflats before the dilution potential of the open water is realized. Adsorption phenomena can be conservatively assumed to reduce the concentrations by another factor of 10 resulting in a combined total attenuation factor of 100. Arsenic in groundwater will be found predominantly in the pentavalent form because it is readily oxidized to arsenic V (USEPA, 1984).

The dominant environmental fate processes reported for arsenic is sorption to soil particles (predominantly clays) and particulate organic matter (Pavlov, 1987 and Versar, 1979. Arsenic

DRAFT

also has a strong affinity to form insoluble complexes with hydrous iron and manganese oxides (Versar, 1979).

HYDROGEOLOGY

Geologic Setting

The site is located on the gently sloping pediment of the Berkeley Hills, midway between the southeast trending hill front and the flatlands along the east side of the San Francisco Bay. According to a geologic map by Radbruch, the site is underlain by the Temescal formation, an alluvial fan deposit comprised of interbedded lenses of clayey gravel, sandy silty clay and sand-silt-clay mixtures. In cross-section D (west) to D'(east) found in the '205J Report "Geohydrology and Groundwater - Quality Overview, East Bay Plain Area, Alameda County, California" published by the Alameda County Flood Control and Water Conservation District in June 1988 the stratigraphy indicates that the area of Berkeley between the Eastshore Freeway (US 80) and San Pablo Avenue us underlain by interfluvial basin deposits and bay mud. This is confirmed, to a certain extent, by the borings on-site. However, it appears that the bay mud may be the more predominant formation/structure beneath the northern portion of the site.

Site Hydrogeology

Sediment encountered during drilling consisted primarily of deposits of the Bay Mud and Temescal Formations. Directly beneath the asphalt/concrete was a dark gray to light tan, stiff clay which overlies a more permeable zone consisting of a clayey sand with pebble inclusions consisting of chert. This more permeable layer (encountered at approximately 9 to 10 feet below grade) varied from about one foot to four feet in thickness in the borings adjacent to the former UST site. Although this layer contained some moisture, there was not enough moisture present to allow water to flow freely. Below this permeable zone was a brown sandy stiff clay, which was dry. In this layer, grain size increased with depth until the water table was encountered at approximately nineteen feet below grade. More sand and 1-inch size pebbles were observed at this depth. All water samples have collected from this zone.

The reported groundwater gradient based on wells penetrating the 19-foot water bearing zone on the adjacent property to the north (Peerless Electric/Lighting Co., 2220 4th St.) is toward the northwest.

The general groundwater gradient throughout this area of Berkeley is towards the northwest. However, there may be site specific differences as indicated on DBA Plates 5A, 5B, 5C and 5D, Appendix A.

Beneficial Uses of Aquifer

The Alameda County Flood Control and Water Conservation District 205(J) Report, Figures 15 and 16, do not indicate the presence of any wells - other than groundwater monitoring wells - in the immediate vicinity of the site. Given the proximity of the site to the Berkeley Aquatic Park and the San Francisco Bay it is unlikely that this shallow water bearing zone has a substantial

DRAFT

beneficial use. The major groundwater reservoir is the older alluvium which is present beneath all of the East Bay Plain and extends under San Francisco Bay.

Contaminant Fate Transport

It is very likely that the metal concentrations in the emergent groundwater into the Berkeley Aquatic Park and the Bay mudflats will be significantly less than the 80 ppb detected in P-4. This based on the low concentration of arsenic measured in the groundwater sample from P-4 and the binding characteristics of arsenic.

REMEDIATION ACTIVITIES AND EFFECTIVENESS:

Soil at the site that was impacted by petroleum hydrocarbons has been excavated and transported from the site for disposal and/or recycling. Given the absence of petroleum hydrocarbons in the soil and groundwater adjacent to the gasoline UST area (MEC) and the low levels of TPHd remaining in the soil after the soil was excavated from between buildings 3, 4 and the adjacent Peerless Electric building it is reasonable to assume that the petroleum hydrocarbon contaminated soils have been remediated.

The soil and foundry material beneath and adjacent to Building 3 contain metals at less than the established TTLC and STLC levels and, as such, do not require any remedial action. They can, and should be, left in place underneath the concrete floor of the building.

No permanent groundwater monitoring wells are in place at the site. The one isolated detection of Arsenic at 80 ppb, 30 ppb above the MCL, does not pose a threat to the groundwater and/or the San Francisco Bay.

SUMMARY:

Since September of 1991 the UST at the site has been removed and the site has undergone several extensive subsurface evaluations and two Phase I Environmental Assessments. The analytical suites for the soil and groundwater samples included analysis for Total Petroleum Hydrocarbons as Diesel, Waste Oil, Total Recoverable Petroleum Hydrocarbons, Gravimetric Oil and Grease, Phenols, Title 26 Metals, CAM 17 Metals, compounds detected by EPA Methods 8010, 8020, 8080 as well as other analytical procedures. Some of the investigations were to confirm/verify other data and some were to investigate areas after remediation.

Results of these investigations indicate that the foundry material beneath building 3 contains metals below the established TTLC and STLC levels.

Remedial activities have included the transportation and disposal of soil from the UST removal and the excavation and disposal of over 100 cubic yards of petroleum impacted soil.

DRAFT

A preliminary groundwater investigation was done in early 1993 to determine groundwater gradients and quality beneath the site. The only detection of concern during this investigation was the presence of Arsenic in one sample from one temporary piezometer at 80 ppb. The established MCL for drinking water is 50 ppb.

CONCLUSIONS:

The 5000-gallon UST was properly removed and appropriately disposed of.

The hydrocarbon impacted fill material obtained from around the UST was appropriately characterized and disposed of.

The various metals extant in the foundry material beneath building 3 do not exceed the established TTLC and STLC levels.

The excavation and disposal of the hydrocarbon impacted soil between buildings 3, 4 and the adjacent building adequately remediated this portion of the site and the 1100 ppm of TRPH reported in sidewall sample SW4 appears to be an isolated occurrence and does not represent a threat to the public health or environment

The groundwater analyses for metals done by DBA substantiate the conclusion in the MEC report that the metals containing foundry material beneath building 3 is contained above an intervening Bay Mud/Temescal formation and is not migrating vertically into the groundwater.

The Arsenic found in the temporary piezometer P-4, while exceeding the established MCL for drinking water, does not pose a threat to the human health and environment as it relates to the San Francisco Bay. It is the opinion of DBA that the groundwater underlying the FVA/Delicor site poses no significant threat to the aquatic life of San Francisco Bay due to the presence of arsenic.

RECOMMENDATIONS:

This site, 705 Bancroft Way, Berkeley, CA, should be granted closure by the appropriate regulatory agencies with no further action required by FVA/DELICOR.

PLATE: 5

As a result of the 29 September 1993 meeting with the SFBRWQCB, the City of Berkeley, Peerless Electric, SCI and Dennis Bates Associates, Inc. (DBA), a proposed work plan was prepared by DBA and submitted to the City of Berkeley and the SFBRWQCB on 11/17/93. This workplan addressed the issues raised in Berkeley's October 8, 1993 letter and proposed a plan of action for Berkeley's review and comment prior to preparing and executing a formal workplan. The issues raised in Berkeley's 11/23/93 response to the 11/17/93 letter were addressed in DBA's letter of February 17, 1994 and some of these issues were addressed again in DBA's February 28, 1994 letter.

SPECIFIC RESPONSES TO CITY OF BERKELEY LETTER OF 7/5/94:

ITEM 1 CITY OF BERKELEY LETTER OF 7/5/94 - Confirmation samples will be taken and analyzed as described in paragraph 2, page 5 of the Workplan for Soil Removal and Disposal submitted to the City of Berkeley on June 13, 1994. This paragraph states that sidewall and bottom samples will be taken from each excavation and submitted for Total Threshold Limit Concentration (TTLC) and Soluble Threshold Limit Concentration (STLC) analyses as established in 22-66261.24 of Title 26 CCR.

ITEM 2 CITY OF BERKELEY LETTER OF 7/5/94 - The site is located in an area of the city zoned, under the new West Berkeley Plan as mixed use/light industrial. The major change in permitted uses from the previous M Zoning is that the permitted uses considered to be heavy manufacturing have been taken out of this area and restricted to another area in Berkeley. Another change from the previous M Zoning was that all permitted uses under the old zoning regulations could locate in the M Zone with some uses requiring a `use permit'. Therefore at Delicor, a Deed Notification might be appropriate even if no additional actions are done/undertaken at this site. However, DBA proposes to remove soils containing metals above the TTLC and STLC values. It is our opinion that after removal and disposal of these materials there would be no Deed Notification required. It was also our intention to discuss this and related issues in the report prepared subsequent to the work as opposed to the presenting it in the workplan when hard data is not available.

ITEM 3 CITY OF BERKELEY LETTER OF 7/5/94 - It is our opinion that once the foundry material containing metals above their respective TTLC/STLC values are removed and appropriately disposed of, the levels of metals remaining (below hazardous levels) would be appropriate to leave in the ground beneath the slab and building

There has been some contentiousness regarding the sampling methodology employed by SCI and MEC in evaluating the status of the foundry material beneath Building 3. Both methods are USEPA accepted methodologies and were employed at this site as described in the USEPA RCRA Technical Enforcement Guidance Document (TEGD) SCI was operating in an unknown environment and as such, collected samples as discrete samples from known depths representing a six-inch spectrum of the subsurface. The laboratory received these samples removed the end-cap and took a sample of a certain weight from the approximate middle of the tube. The sample spectrum represented by this particular sample was again reduced in

DBA Project # 92008

May, 1994

PURPOSE

The purpose of this investigation is to excavate, remove and dispose of soil containing metals at or above their respective TTLC's and/or STLC's from four locations at the site. Two of these locations are located beneath the slab floor of Building 3 and two are located immediately adjacent to the building.

INTRODUCTION AND SITE BACKGROUND

The subject property is located at 705 Bancroft in Berkeley, California. The property measures approximately one acre, or about 43,000 square feet. It is situated near the western border of Berkeley in an area of mixed commercial, residential, and industrial properties. The Berkeley Aquatic Park is the nearest surface water body, situated approximately 1/4-mile west of the site. The site is bounded by buildings to the north and east, railroad tracks to the west, and Bancroft Street to the south. A site location map is shown on Plate 1 (dated March, 1993).

PRIOR SITE USE

From the 1930's until the late 1950's, Cal Co., a culvert and corrugated building manufacturer, owned the property (Subsurface Consultants, Inc., SCI, 1992). At that time, a small foundry was located on the property [Recollections of a previous owner, Mr. Stadelhofer].

The foundry was located inside what is now the large warehouse building (Building 3). The owner recalled that most of the floor of the warehouse was concrete except for a dirt strip going down the middle of the building. It was in this area where the molten steel was poured into the 'molds'. It is assumed that the foundry was in operation from the time the warehouse was erected until the property was purchased by the Stadelhofer family at the end of the 1950's.

No further data could be obtained regarding the existence or status of the foundry. A review of aerial photographs showed no obvious signs of a foundry; i.e. no piles of slag metal were observed in any of the aerial photographs. The Stadelhofer family used the property as income property and rented the premises to various tenants who used the property for newspaper storage, printing, automobile restoration and pump repair.

The most recent occupant of the site was FVA/Delicor, a vending machine sales and service company. Five separate buildings that were present on the property were utilized by Delicor in conducting their business. The buildings housed: a vending machine and parts storeroom, a warehouse (used for storing food and for parking delivery trucks), a building containing refrigerators storing perishable foods, a truck maintenance building and an office building, and vending machine repair shop. Other than buildings, the site is covered with concrete, asphalt, or aggregate concrete (Plate 2, dated March, 1993).

DRAFT

A 5,000-gallon underground storage tank was installed in 1984 to store unleaded gasoline for the company vehicles. The tank was permitted and inspected by the Berkeley Fire Department and is the only known underground storage tank to have been used at the 705 Bancroft Way site (Plate 1).

Since Delicor has vacated the premises in 1990, the buildings on-site have been vacant (Plate 2).

POTENTIAL CONCERNS IN VICINITY OF SUBJECT SITE

Records of Environmental Cases in the surrounding area were reviewed by the Miller Environmental Company (MEC) and Dennis Bates Associates, Inc. (DBA). Records were reviewed at the San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) office in Oakland, the California Department of Health Services (DHS) office and the offices of the Federal Environmental Protection Agency (EPA). Within those records, 22 cases were found to lie within a 1/2-mile radius of the subject site.

REVIEW OF ENVIRONMENTAL INVESTIGATIONS DONE BY OTHERS

September 1991 Miller Environmental
A permit for tank removal was issued to Miller Environmental Company, Inc. by the Berkeley Health Department. One 5000-gallon underground storage tank used to store gasoline fuel, was removed. Soil samples collected by MEC personnel following removal of the UST contained no detectable levels of hydrocarbon contamination. The tank was properly manifested and disposed of by H & H Ship Service Company and Levin Metals Corporation.

October 1991 Miller Environmental
MEC performed a walk-through site inspection for the purpose of site description and observation of site activities. Waste disposal locations and potential problem areas were identified. While a history of site use and routine waste storage within the confines of the buildings and yard was compiled during the Phase I inspection, no significant hazardous conditions were observed.

November 1991 Miller Environmental
The Phase I Report by MEC (dated 11/07/91) included a review of records of Underground Storage Tank Releases at the Regional Water Quality Control Board (RWQCB) office in Oakland. Within those records, thirteen cases were identified within a 1/2-mile radius of the subject site. The nearest property with a 'case file' was adjacent to the Delicor property and owned by Peerless Lighting.

January 1992 Subsurface Consultants, Inc.
Subsurface Consultants, Inc. (SCI) reviewed the work done by MEC and performed additional research and studies that they considered to be necessary to characterize environmental conditions existing at the site. This additional work included the drilling and sampling of 18 test borings. Selected soil and groundwater samples were analyzed for various for contaminants.

DRAFT

In their conclusions and recommendations, SCI listed three environmental concerns that would require further study and remediation. These three concerns were: foundry wastes, oil and grease contamination, and possible groundwater contamination.

April 1992 Miller Environmental

Because low levels of benzene were detected in the spoils pile, the City of Berkeley and the SFBRWQCB recommended the collection of water samples downgradient from the former UST. Laboratory analytical results from the MEC investigation indicated **no petroleum hydrocarbon contamination in either soil or groundwater beneath the former UST site.**

September 1992 Miller Environmental

With the concurrence of the City of Berkeley and the SFBRWQCB, MEC was authorized by FVA/DELICOR to perform additional studies beneath Building 3 to: determine the areal extent and depth of foundry wastes, characterize the foundry wastes and obtain a detailed description of the shallow sub-surface soil beneath the building. MEC reported that the TTLC and/or STLC limits for Copper, Lead or Zinc were not exceeded in any composited or grab samples obtained from the subsurface material and that Total Oil and Grease results from the 4 to 4.5 foot depth ranged from 10 to 90 ppm.

January 1993 Dennis Bates Associates, Inc.

In January and February of 1993, DBA excavated about 100 cubic yards of heavy petroleum impacted soil from the site, collected confirmation samples from the sides and bottoms of the excavation, backfilled and compacted the excavated area to grade (See Plates 3 and 4, dated March, 1993). The 100 cubic yards of soil was characterized and disposed of by REMCO of Richmond, CA. DBA also installed four temporary piezometers and collected groundwater samples. Groundwater samples contained Arsenic at 80 ppb in P4 and at 6 ppb in P3 (See Plate 5, dated March, 1993).

April 1994 Dennis Bates Associates, Inc.

On 20 April 1994, DBA installed two additional temporary piezometers, P5 and P6 (See Figure 1 dated 16 November 1993) at the site down gradient from the previous piezometers where Arsenic was detected. Groundwater from these two temporary piezometers was tested for TPH/BTEX, TPHD, TOG, PCB's as well as Copper, Lead, Arsenic and Zinc. No Lead, Arsenic, TPHG/BTEX, TOG or PCB's were detected in groundwater from these wells. Copper, Zinc and TPHD were detected in groundwater from P5 at 0.01, 0.02 and 0.13 mg/l respectively. Only Zinc at 0.01 mg/l was detected in groundwater from P6.

HYDROGEOLOGY

Geologic Setting

The site is located on the gently sloping pediment of the Berkeley Hills, midway between the southeast trending hill front and the flatlands along the east side of the San Francisco Bay. According to a geologic map by Radbruch, the site is underlain by the Temescal formation which is an alluvial fan deposit comprised of interbedded lenses of clayey gravel, sandy silty clay and sand-silt-clay mixtures.

DRAFT

Site Hydrogeology

Sediments encountered at a depth of 1 to 3 feet below ground surface during previous drilling at the site were reported to belong to the Temescal Formation. Directly beneath the paved surface was a dark gray, stiff clay which overlies the Temescal formation. Below this zone was a brown sandy stiff clay, which was dry. In this layer, grain size increased with depth until the water table was encountered at approximately nineteen feet below grade. More sand and gravel were observed at this depth. All groundwater water samples have been collected from this water-bearing zone.

The reported groundwater gradient based on wells penetrating the 19-foot water bearing zone on the adjacent property to the north (Peerless Electric/Lighting Co., 2220 4th St.) is toward the northwest.

SCOPE OF WORK

The proposed scope of work will be conducted according to the DBA standard operating procedures attached to this workplan as Appendix A. Work proposed during this phase will address the findings in the Subsurface Consultants Inc. (SCI) report of 6 January 1992 where levels of certain metals were detected above the TTLC and/or STLC regulatory criteria. There were only four areas of the site where these levels were exceeded: SCI Boring B9 located in the northwest corner of Building 3, SCI Boring B7 located adjacent to the east wall of Building 3, SCI Boring B5 located between Building 3 and the adjacent Peerless Electric building and SCI Boring B17 located between Building 3 and the railroad right-of-way, Figure 2.

Proposed work includes the following :

1. Break and remove a 10 foot by 10 foot (approximate) slab of the concrete floor of building 3 and to excavate the area to a depth of about 3 feet. This section includes SCI Boring B9 and MEC Boring TB1. SCI reported, in a sample obtained at a depth of 1.5', results above the TTLC for Copper and above the STLC limits for Copper and Lead. The sample taken by SCI at 3.0 feet was significantly below the regulatory criteria for Arsenic, Total Chromium, Copper, Lead and Zinc. Figure 2 shows the location of this excavation.

2. Excavate a 10 foot by 10 foot (approximate) section of soil from the vicinity of SCI Boring B5. Boring B5 is located between Building 3 and the adjacent Peerless Electric building. SCI detected Lead above the TTLC and COPPER, Lead and Zinc above the STLC limits in a sample taken at 1 foot. CAM 17 Metals results from another sample taken from boring B5 at four feet were significantly below regulatory criteria for Arsenic, Total chromium, Copper, Lead and Zinc. To access this location a section of the corrugated steel side of the building must be removed. Figure 2 shows the location of this excavation.

3. Break and remove a 10 foot by 10 foot (approximate) section of the concrete floor of building 3 and to excavate the area to a depth of about 3 feet. This section includes SCI Boring B7 and MEC Boring TB12. SCI reported soluble lead to be present at 15 ppm from the sample obtained at 1.5 feet deep. SCI obtained an additional sample from this location at a depth of 4.0 feet. However, the sample was not analyzed for any of the soluble metals. Figure 2 shows the location of this excavation.

DRAFT

4. Excavate a 10 foot by 10 foot (approximate) section of soil from the vicinity of SCI Boring B17. Boring B17 is located between Building 3 and the adjacent railroad right-of-way where SCI detected Lead above the STLC limits in a sample taken at 2.0 feet. To access this location a section of the corrugated steel side of the building must be removed. Figure 2 shows the location of this excavation.

   Sidewall and bottom soil samples will be taken following DBA Standard Operating Procedures for confirmation. These samples will be analyzed for the TTLC and STLC for Copper, Lead, Zinc and Arsenic.

5. The excavations outside the building will be back-filled with Class II 3/4" aggregate base material and compacted. The area beneath the building will be back-filled with the aggregate base material to sub-grade and the concrete slab replaced.

Soil removed from these excavations will be stockpiled inside Building 3, characterized and appropriately disposed of. We anticipate transporting the soil to REMCO in Richmond, CA for recycling. REMCO generally requires a CAM 17 metals analysis, total petroleum hydrocarbons, TPHG/BTEX and an RCI if appropriate.

All samples shall be delivered to a laboratory certified by the State of California Department of Health Services (DHS) for testing and analysis of water and hazardous waste.

Samples will be analyzed using procedures developed by the State of California and the United States Environmental Protection Agency (USEPA). Detection limits suitable for the soil tests requested and concentrations present will be stated on the laboratory reports.

DRAFT

REPORTING

DBA shall submit a technical report to the appropriate agencies upon completion of this work. The report shall include a site plan, all analytical results, and interpretation of data as well as appropriate recommendations regarding site closure and/or additional investigations if deemed necessary.

TIMETABLE

All work should be completed approximately one month after approval of this workplan. Jurisdictional staff members will be notified prior to drilling and water sampling operations.

Re: 705 Bancroft Way, Berkeley
Implementation of Workplan for Soils Remediation

Dear Mr. Al-Hadithy:

This is to record our understnading of the agreement as culminated during the telephone conversation of January 9, 1995 between yourself and the undersigned concerning the workplan of December 14, 1994 as prepared by Dennis Bates Associates, Inc.

We have presented our findings and requested the City that the subject site is closed with no further action required. You have expressed your concern about the absence of the bottom soil samples of excavation 1, 2, and 4. Therefore, you have requested the bottom soil samples of Site 1, 2, and 4 to be collected and that you witness the confirmatory sampling. You have requested a two-day prior notice for your presence at the soil sampling.

Dennis Bates Associates, Inc. has been instructed to arrange for a date as soon as practical and to notify you in at least two day advance.

Please advise me by return, If the foregoing does not correctly set forth your understanding of our agreement.

Sincerely,

Wataru Takenouchi

RE: PROGRESS REPORT FOR FVA/DELICOR
705 BANCROFT WAY, BERKELEY, CA

Dear Mr. Al-Hadithy:

Dennis Bates Associates, Inc. (DBA) is pleased to transmit this progress report for the FVA/Delicor site located on Bancroft Way in Berkeley.

The purpose of this progress report is to describe the excavation, stockpiling and sampling of soil from four locations beneath and adjacent to Building 3 (See Plate 1 for locations).

The locations and sampling/analytical protocol is in accordance with DBA's Workplan and discussions with the City of Berkeley and the SFBRWQCB. About 150 cubic yards of material was removed and remains stockpiled inside Building 3 (See Plate 2 for locations of soil piles).

The work completed is described below.

EXCAVATION AND STOCKPILING

On 23, 24 and 25 September 1994, Dennis Bates Associates, Inc. (DBA) removed sections of the sides of Building 3, saw cut and broke the concrete and excavated soils from two locations inside the building and two locations outside the building, Plate 1.

- All excavation and materials handling was done by Reinholdt Engineering of Martinez, CA using appropriately trained laborers following the Site Safety and Health Plan previously submitted to the City of Berkeley..

- Site 1 was at the location of the previous Miller Environmental Company (MEC) boring TB1 and Subsurface Consultants Inc. (SCI) boring B9. Once the concrete was removed from this location the subsurface materials were excavated to a depth of four feet below the surface of the concrete. Finished dimensions of this excavation were 13 feet X 16 feet X 4 feet.

DRAFT

Environmental Consulting ■ Hazardous Materials Management

705 Bancroft Way

- Site 2 was at the location of SCI boring B7. Once the concrete was removed from this location the subsurface materials were excavated to a depth of four feet below the surface of the concrete. Finished dimensions of this excavation were 14 feet X 16 feet X 4 feet.

- Site 3 was at the location of SCI boring B17 west of the building between the building and the shoring adjacent to the railroad spur. The finished dimensions of this excavation were 20 feet X 8 feet by four feet.

- Site 4 was at the location of SCI boring B5 east of the building between the building and the adjacent Peerless Electric Company building.

- Materials removed from the excavations were stockpiled on concrete inside of Building 3 (see Plate 2 for stockpile locations).

SOIL SAMPLING

- On 4 October 1994 DBA collected 15 discrete soil samples from the SIDEWALLS of the excavations and one sample from the bottom of excavation 3.

- No sidewall sample was collected from the west side of excavation 2 because the excavation extended to the steel retaining structure adjacent to the railroad spur.

- Because of an early rainfall, the bottoms of excavations 1, 2 and 4 contained standing water and or mud and were not sampled. Water and mud are still present in the excavations.

- Soil samples were collected at 3.5 feet below grade by driving a clean brass sampling tube into the sidewall of the excavation. The tube was then removed, the ends covered with Teflon tape and sealed with plastic caps. Each sampling tube was then labeled and placed in a cooler containing "Blue-Ice" and transported under chain-of-custody procedures to PACE Inc. for analysis.

- Each soil sample was to be analyzed for Arsenic, Copper, Lead, Zinc and TRPH (EPA 9017/418.1).

- Analytical results are summarized in Table 1 and copies of the certified laboratory results are attached to this letter.

- On 4 October 1994 DBA also collected soil samples from the three stockpiles of soil at the site.

- For stockpile SP1, five samples were collected at various locations and depths representing 50-cubic yards of stockpiled soil to be composited (5 to 1).

- For stockpile SP2, five samples were collected at various locations and depths representing 50-cubic yards of stockpiled soil to be composited (5 to 1).

DRAFT

- For stockpiles 3 and 4, each containing less than 50-cubic yards of material, five samples were collected at various locations and depths to be composited (5 to 1).

- The composited sample from each soil pile was to be analyzed for Arsenic, Corrosivity, Cyanide (reactive), Flash Point, Mercury, Selenium, CAM 17 Metals, Total Petroleum Hydrocarbons (EPA 9071/418.1), Total Fuel Hydrocarbons as Gasoline (EPA 8015M) and Purgeable Aromatics (EPA 8020M).

Analytical results are summarized in Table 1 and copies of the certified laboratory results are attached to this letter.

DISCUSSION OF ANALYTICAL RESULTS

Analytical results for Arsenic, Copper, Lead, Zinc and TRPH from the sidewall and bottom samples are presented in Table 1. Also included in Table 1 are the Bay Mud background levels (provided by the City of Berkeley) and the appropriate TTLC.

- Zinc at 180 milligrams/kilogram in sample 1N, was detected in amounts slightly above the Bay Mud Background level of 110.5 milligrams/kilogram.

- Copper at 48 milligrams/kilogram in sample 3N, was detected in amounts slightly above the Bay Mud Background level of 43 milligrams/kilogram.

- TRPH was detected at 57 milligrams/kilogram in only one sample, 3S.

- Analytical results from the soil pile characterization indicated that the material does not meet the criteria for hazardous material.

- In no sample were the RCI limits exceeded.

- In no sample were any of the CAM 17 metals TTLC's exceeded.

- TRPH was detected at 440 mg/kg in SP3 and at 76 mg/kg in SP4.

- TPH as gasoline/BTEX was not detected in any soil sample.

SUMMARY AND CONCLUSIONS

- The excavation of the areas described in this progress report have removed the soil identified by the SCI Report as containing metals or hydrocarbons above the established TTLC or other limits as confirmed by sidewall sampling.

- Out of the 15 soil samples analyzed for a total of 60 metal analyses, only two locations, 1N and 3N (the north sidewalls of excavations 1 and 3), were metals detected that only slightly exceed the Bay Sediments Background levels (see Plate 1 and Table 1)

EXECUTIVE SUMMARY

The property at 705 Bancroft Way in Berkeley, California is currently owned and occupied by Delicor Inc., a vending machine sales and service company. In November 1991, Miller Environmental Company, Inc. (MEC) was retained by Delicor to perform a Phase I Assessment of the property for a real estate transaction. The assessment revealed that foundry activities had been performed at the site prior to Delicors' occupancy.

Peerless Lighting Corporation retained Subsurface Consultants, Inc. (SCI) to review MEC's assessment and perform additional research and studies as necessary to characterize environmental conditions existing at the site. SCI's assessment included (1) research of historical uses of the site and nearby properties, (2) performing a detailed site reconnaissance, (3) drilling and sampling 18 test borings, and (4) analyzing selected soil and groundwater samples for contaminants.

The results of SCI's assessment indicates that the site has been occupied by at least three different companies which conducted foundry type activities from the early 1920's to the late 1950's. Studies to date have confirmed the presence of foundry sand and debris overlying the north half of the property and along the western property line. The foundry sand and debris layer which varies in thickness from 1 to 3 feet, contains elevated concentrations of arsenic, chromium, copper, lead, zinc, and oil and grease. Elevated concentrations of oil and grease have also

DRAFT

been identified near previous air compressor locations. In addition, groundwater from a test boring situated near the northwest corner of the property contains significant concentration of petroleum hydrocarbons.

Groundwater in the area has been impacted at contiguous properties by trichlorethene (TCE), 1,1,1-trichloroethane (TCA) and pentachlorophenol (PCP). The TCE appears to be a regional problem and the TCA and PCP are believed to related to point source releases on the property to the north. These compounds were not detected in the grab groundwater sample obtained from the site.

As shown herein the property has several environmental conditions which should be remediated and\or mitigated. Based on the limited studies we have identified the following environmental concerns.

1. The layer of foundry sand and debris contains heavy metals exceeding hazardous waste criteria and hence will likely require remediation. While the layer is relatively thin, it is widespread as it extends beneath existing structures. The remediation method(s) employed should take into consideration the future use of the property and will likely require the existing structures to be removed.

2. The oil and grease contamination near the two previous compressor areas exist in concentrations which will likely require remediation. Although the contamination is believed to be relatively localised additional investigation should be performed to define the lateral and vertical extent.

3. Petroleum hydrocarbons exist in the groundwater beneath the site. The source of these contaminants is unknown. In addition, contamination sources are known to have impacted groundwater at adjacent sites. A groundwater investigation should be conducted to (1) evaluate the source of petroleum hydrocarbons, (2) access the impacts of on-site contamination, and (3) evaluate water quality in the area.

DRAFT

1.0 INTRODUCTION

This report records the results of an environmental assessment conducted by Subsurface Consultants, Inc. (SCI) for the property at 705 Bancroft Way in Berkeley, California. The site occupies the southwest corner of the city block surrounded by Bancroft Way, Allston Way, Fourth Street and a Southern Pacific Railroad right-of-way as shown on the Site Plan, Plate 1.

Miller Environmental Company Inc. (MEC) was retained by the current property owner, Delicor Inc., to perform a Phase I assessment at the site. The purpose of the MEC assessment was to evaluate the potential of environmental contamination existing at the site. MEC's research revealed that foundry activities were performed at the site from the 1930's through the 1950's.

Peerless retained SCI to review MEC's report and perform additional research and studies as necessary to characterize environmental conditions which may exist. As outlined in the proposal dated November 6,1991, the scope of services for SCI's assessment was to include the following phases:

Phase I - Historic Use Research

Research the historical use of the site and neighboring properties, conduct a detailed site reconnaissance and draw conclusions regarding the likelihood of on-site and off-site sources of contamination impacting the site.

Phase II - Sampling and Analytical Testing

Sample and analyze samples from test borings drilled in areas of environmental concern to check for contamination.

DRAFT

2.0 SITE CONDITIONS

2.1 Geology

The site is located on a broad alluvial plain bordered by the Berkeley Hills on the east and San Francisco Bay on the west. According to a geologic map by Radbruch[1], the site is underlain by the Temescal formation, an alluvial fan deposit comprised of interfingered lenses of clayey gravel, sandy silty clay, and sand-clay-silt mixtures. The 1856 bay shoreline, as shown by the U.S. Coast and Geodetic Survey[2], extended parallel to the west side of the current railroad right-of-way.

2.2 Surface Conditions

The relatively level, nearly rectangular site measures about 130 by 300 feet in plan and comprises just less than 1 acre. It is bordered by Bancroft Way to the south, a Southern Pacific Railroad right-a-way (formally Third Street) to the west and commercial/light industrial developments to the north and east. The site is currently occupied by the five structures shown on Plate 1. The buildings are currently used for office space, warehousing of food and machine parts, truck repair, vending machine repair, and truck parking.

DRAFT

---

[1] "Areal and Engineering Geology of the Oakland West Quadrangle, California", USGS Map I-239

[2] Unpublished U.S. Coast and Geodetic Survey planetable sheets, Numbers XXIV and XXV, U.S. Coast Survey, San Francisco Bay, California, 1856.

Adjacent to the south side of the cold food warehouse building is a steam cleaning station currently used by Delicor. Reportedly, vending machines and trucks are cleaned in the station. Water from the station is collected in a sump. It is unclear whether the sump discharges to the sanitary or storm water sewer.

A concrete pad was observed adjacent to the east side of the main warehouse. The pad is believed to be the foundation for a previous air compressor. Inside the warehouse are several air line ports.

A retaining wall extends along the west side of the property, with the adjacent neighboring ground surface about 3 to 4 feet lower than the subject property. The northern portion of the wall is composed of galvanized steel, the remaining wall consists of wood. The galvanized wall is badly corroded in an area approximately 110 feet south of the northwest corner of the property. Materials exposed in the corroded area appear to be foundry sands and wastes, and miscellaneous debris. The corroded area is shown on Plate 1.

DRAFT

3.0 SITE USAGE HISTORY

3.1 General

Our understanding of the past use of the site and neighboring parcels is based upon information obtained from the following sources:

1. Sanborn Fire Insurance maps,
2. Historical telephone directories,
3. Building plans and permits,
4. Phone interview with Mr. Fred Stadelhofer, a previous property owner,
5. Fire department records,
6. Historic Atlas Map of Alameda County,
7. Regulatory agency files, and
8. Aerial photographs[3].

3.2 705 Bancroft Way

The site is situated in an area which has been developed since the late 1800's. Historic uses are graphically summarized on Plate 2 and described in the following paragraphs. Copies of pertinent reference materials are presented in Appendix B.

The Historic Atlas Map of Alameda County (Thompson & West, 1878) indicates that the property was originally part of the Berkeley L. T. I. Association Tract. The tract extended from

---

[3] Pacific Aerial Surveys photographs reviewed are summarized in Appendix A.

DRAFT

Bancroft to beyond University to the north, and from the shoreline to about San Pablo Avenue to the east. The site in particular was bordered on the west by the Northern Railway right-of-way. The shoreline in 1878 was shown to be situated near the present eastern side of the Berkeley Aquatic Park.

The earliest information regarding past site uses was obtained from historic phone directories and Sanborn Fire Insurance Maps. The 1911 Sanborn map shows that the central portion of the site was occupied by the Century Mercantile Company and a Southern Pacific Railroad Depot was situated near the southwest corner of the site. Historic phone directories indicate that the mercantile was on-site from about 1908 through 1917.

In about 1925, the Oakland Furnace and Foundry Company occupied the subject property and the neighboring property to the east. A 1929 Sanborn map shows that the mercantile and depot structures were removed and two new buildings were constructed. The main new structure extended across the central portion of the properties and housed a foundry and a pattern storage area. The second structure was a small warehouse situated in the southwest corner of the subject property. The foundry, which apparently had an earthen floor was present on the subject property. It is unclear when Oakland Furnace and Foundry Company ceased operation. Based on aerial photograph review, structures present in 1947 were oriented in similar patterns as presented in the 1929 map.

In about 1949, Armco Drainage and Metal Products company occupied the property. The main Oakland Furnace and Foundry

DRAFT

structure was removed and a new foundry building was constructed across the northern 1/3 of the site. The foundry had an earthen floor. A dust collector and a compressor house were located just outside the south side of the structure. It appears that foundry patterns were stored in the small structure which had been a warehouse for the Oakland Furnace and Foundry Company. Another smaller storage building also existed just to the east of the pattern warehouse. Armco remained at the site through the 1950's.

Near the end of the 1950's the property was purchased by the Stadelhofer family of Berkeley. The Stadelhofer family used the site as income property through the 1970's. Reportedly, tenants used the property for newspaper storage, automobile restoration, pump repair, and printing. Improvements to the property made during the Stadelhofer ownership included surfacing the main structure (which had housed the Armco foundry) with concrete, constructing the current office, truck repair and cold storage warehouse buildings, and paving access ways.

In the late 1970's Coffee System Inc. (CSI), now known as Delicor, purchased the property from the Stadelhofer family. A 5000 gallon underground storage tank was installed at the site in 1984. The tank stored unleaded gasoline used to fuel CSI delivery trucks. The tank was permitted and it's installation was inspected by the Berkeley Fire Department. The tank was removed on September 26, 1991. Soil samples obtained from below the tank contained non-detectable concentrations of fuel constituents. Soil excavated from the tank area was disposed of at an appropriate landfill and

DRAFT

the excavation was backfilled with clean imported soil. The City of Berkeley has recommended site closure status for the tank area.

3.3 Surrounding Neighborhood

The surrounding neighborhood has been utilized by a mix of residential, commercial, retail and light industrial developments. According to Sanborn maps, and current observations, non-residential uses that have occurred within the area include an elevator company, iron works, nurseries, paint manufactures, a soap factory, warehouses , a creamery, and electric light manufacturing.

DRAFT

4.0 ENVIRONMENTAL CONCERNS

Based on a review of a Phase I Assessment performed by MEC and our own research during the Historic Use Research phase of our assessment several on-site and off-premises environmental concerns were revealed. These concerns are addressed in the following sections.

4.1 On-Site

Current and past uses of the site raise a number of environmental concerns. The concerns are summarized below.

1. Near surface soils in the areas of the previous foundries may contain heavy metals, petroleum hydrocarbons, oil and grease and solvents.

2. Soils near the existing and previous compressor pads may contain oil and grease.

An investigation program was developed to check for the existence and extent of soil contamination associated with the previous foundries. The program is described in more detail in Section 5.0.

4.2 Off-Premises

Based on a review of environmental cases compiled by the San Francisco Regional Water Quality Control Board (RWQCB), the California Department of Health Services (DHS) and the Federal Environmental Protection Agency (EPA), there are 16 documented environmental cases within about 2000 feet of the site. The addresses of these cases and their locations are shown on the Environmental Case Plan, Plate 3.

DRAFT

The site adjacent to the north has had documented releases requiring agency oversight. A brief summary of information contained in the agency file is described below.

747 Bancroft Way and 2220 Fourth Street

In 1983, Brown and Caldwell (B&C) performed an investigation to identify the presence or absence of priority pollutant pesticides in subsurface soils at the site. Elevated levels of aldrin, heptachlor, and chlordane were detected in the soil. IT Corporation removed contaminated soil and the area was backfilled with the approval of the DOHS. At the request of the RWQCB, a groundwater investigation was implemented by B&C. B&C installed four wells which they monitored from 1985 through 1987. Although no pesticides were detected in the water samples, various organic priority pollutants, including 1,2-Dichloroethane (DCA), trans-1,2-Dichloroethene (DCE), trichloroethene (TCE), pentachlorophenol (PCP), chloroform and chloroethane were detected.

In 1988, the Mark Group (MG) performed a groundwater investigation at the site. Six wells were sampled during the MG investigation. The same organic priority pollutants were detected as when B&C performed the investigation. MG concluded that the presence of TCE was representative of a regional problem. The presence of the other organics were attributed to local point source releases.

Documents also indicate that an empty, unused underground storage tank was removed from the 2220 Fourth Street property in

DRAFT

1987. Samples obtained below the tank contained total fuel hydrocarbons at or below the detection limit.

5.0 FIELD EXPLORATION

Based on the environmental concerns identified during this study, an investigation program was developed to preliminarily assess soil and groundwater quality. In general, subsurface conditions were investigated by drilling and sampling 18 test borings. Numerous soil samples were retained from the borings. In addition, a grab groundwater sample was obtained from within one of the borings. Boring locations are shown on Plate 1.

Test Borings B-2 thru B-4 and B-10 thru B-13 were drilled using 4.0-inch-diameter, trailer mounted, solid flight auger equipment. Due to limited access the remaining borings were drilled utilizing a portable "Minute Man" rig equipped with 3-inch-diameter solid flight augers. At the completion of drilling, all the borings except B-5, B-9 and B-14 were backfilled with cement grout and capped with either concrete or asphalt as appropriate to match existing conditions. These borings were was also backfilled with cement grout and capped following collection of a grab groundwater sample from B-9 and groundwater depth data.

DRAFT

Our engineer observed drilling operations and prepared logs of the soils encountered. The Logs of Test Borings are presented on Plates 4 through 12. The soils are classified in accordance with the Unified Soil Classification System described on Plate 13. Undisturbed soil samples were obtained from the test borings at frequent intervals. The samples were retained in brass sample liners. Teflon sheets were placed over the liner ends prior to capping, taping and labeling. The samples were refrigerated until delivery to the analytical laboratory. The samples were accompanied by Chain-of-Custody forms, copies of which are presented in Appendix C. Drilling and sampling equipment was steam cleaned prior to each use. Soil cuttings generated during drilling and steam cleaning water were placed in DOT approved 55-gallon drums and left on site for later disposal by others.

Soil from each sampling interval were placed in plastic "Ziplock" bags and screened for organic vapors using an organic vapor meter (OVM-580A). No organic vapors were encountered in any of the samples.

DRAFT

6.0 SUBSURFACE CONDITIONS

6.1 Soil Conditions

Based upon the results of our field exploration, it appears that a majority of the site is blanketed by a thin layer of fill. The fill consists of fine-grained sand and miscellaneous debris. The sand contains varying quantities of gravel and rock fragments, and its' color varies from light brown to black. The debris consists of metal fragments, slag, wire, and glass. Given the history of the site and the consistency of the fill, we judge the fill is previous foundry sand and wastes.

The foundry fill, which appears to vary from 1 to 3 feet thick, is underlain by interbedded alluvial deposits of the Temescal Formation. The upper few feet of alluvium consists of silty clays. Medium dense clayey sands were encountered beneath the clays in some of the borings.

6.2 Groundwater Conditions

Test borings B-5, B-9 and B-14 were left open after drilling to check the depth to groundwater. Two days after drilling, groundwater had risen to a depth of about 11 feet below the groundsurface in boring B-9. Boring B-14 was moist at the bottom one day after drilling and boring B-5 was dry two days after drilling. Based on data generated by others at adjacent properties, groundwater appeared to be stabilized at a depth of about 11 feet in 1988. The reported groundwater gradient was toward the north-north west.

DRAFT

A hydrocarbon odor was observed while obtaining the grab groundwater sample from boring B-9. However no free product nor sheen was noted on the sample.

7.0 ANALYTICAL TESTING

Selected soil samples and a grab groundwater sample were analyzed by Curtis & Tompkins, LTD, a State of California Department of Health Services (DHS) certified analytical laboratory for the tests performed. The analytical test reports are presented in Appendix C. The analytical test results are summarized in Tables 1 and 2.

The testing program implemented during the assessment included screening selected samples for total petroleum hydrocarbons, total oil and grease, total metals, and semi-volatile and volatile organics. Specific test methods utilized are summarized below.

1. Total petroleum hydrocarbons, as diesel (TPH), sample preparation and analysis using EPA methods 3550 (sonication) and 8015 (modified, gas chromatograph coupled to a flame ionization detector), and
2. Purgeable Aromatic Hydrocarbons, sample preparation and analysis using EPA methods 5030 and 8020 (gas chromatograph coupled to a flame ionization detector).
3. Purgeable halocarbons, sample preparation and analysis using EPA methods 5030 and 8010 (gas chromatograph and electrolytic conductivity detector).
4. Semi-volatile organics and PCB's, sample preparation and analysis using EPA methods 3550 and 8270 (gas chromatograph with mass spectroscope).
5. Total and soluble metals, analysis using EPA methods, and

DRAFT

6. Total oil and grease, analysis using SMWW17:5520.

Based on the results of the initial analyses, it became apparent that some of the samples obtained elevated concentration of several heavy metals including arsenic, copper, lead, silver, and zinc. Selected samples were subsequently analyzed for soluble metal concentrations.

8.0 CONCLUSIONS AND RECOMMENDATIONS

8.1 General

Based upon the results of this investigation, we conclude that there are several on-site environmental concerns that will require further study and subsequent remediation. These concerns include (1) foundry wastes containing heavy metals exceeding hazardous waste concentrations, (2) oil and grease contamination in excess of regulatory limits near previous compressors, and (3) petroleum hydrocarbon contamination in groundwater beneath the site. Our findings regarding these concerns are addressed in the following sections.

8.2 Foundry Wastes

Foundry wastes blanket the north and western portions of the site. These materials contain widely varying concentrations of heavy metals as well as oil and grease. Concentrations of arsenic, copper, lead and zinc within these materials are well above those detected in apparently uncontaminated on-site samples. In addition, numerous samples exceed California hazardous wastes

DRAFT

criteria. Highlighted in Table 1 are samples which exceed either the Total Threshold Limit Concentration (TTLC) or the Soluble Threshold Limit Concentration (STLC) criteria as defined in the CAC Title 26. It appears that the most prevalent contaminant exceeding regulatory criteria is soluble lead.

8.3 Compressor Areas

8.3.1 Oil and Grease

Shallow soil samples from Borings B-5, B-6 and B-13 which were situated near previous air compressor locations contained concentrations of 660, 1100 and 12,000 parts per million (ppm) of hydrocarbon oil and grease, respectively. Regulatory guidelines for hydrocarbon contamination require remediation of concentrations in excess of 1000 ppm. Where concentrations over 100 ppm exist, a groundwater investigation is required. Depending on the results of the groundwater investigation and the risk of future groundwater impacts, hydrocarbon clean up levels significantly less then 1000 ppm may be required. At this time, the extent of hydrocarbon contamination is not defined.

8.3.2 Lead

The shallow soil sample from boring B-5 situated adjacent to the existing compressor pad contained total lead in excess of lead's TTLC hazardous waste criteria. The extent of lead contamination in this area is unknown.

DRAFT

8.4 Groundwater Contamination

8.4.1 On-Site Contamination

The results of the analysis of the grab groundwater sample indicate that significant concentrations of gasoline, diesel and toluene exist in groundwater beneath the previous Armco Foundry area. To date, the source and/or extent of groundwater contamination is unknown. Review of the groundwater data from adjacent sites does not indicate a significant currently identified off-site source. Hence, we conclude that an on-site source of groundwater contamination, which has not been identified by the limited studies to date, could exist. Additional investigation is required to assess the groundwater contamination issues.

8.4.2 Off-Site Contamination

Several significant off-site contaminant sources were identified during our investigation. The impact of these sources on groundwater quality at the site should be evaluated during future groundwater studies.

Dr. Nabil Al-Hadithy
City of Berkeley Emergency and
Toxics Management Program
2065 Kittredge Street, Suite K
Berkeley, CA 94704

Re: 705 Bancroft Way, Berkeley

Dear Dr. Al-Hadithy:

This letter report covers:

1. The disposal of the soil stock piled at the subject site,
2. The sampling and analysis of the bottom of excavations 1, 3 and 4,
3. The sampling and analysis of the discolored soil on the sidewall of excavation 1,
4. The sampling and analysis of the collected rainwater and
5. The disposal of the rainwater to the storm sewerage system.

On February 16, 1995, under your direct supervision, the two soil stockpiles at the site were loaded and transported to Port Costa for disposal by recycling. The certificate of disposal will be forwarded to you as soon as the soils are processed. Also, on this date bottom samples were obtained from the bottoms of excavations 1 (E1), 3 (E2), and 4 (E4) as well as one sidewall sample from excavation 1 (S1) where the soil was discolored.

Rain water (RW) was collected from excavations 1, 3 and 4 to be composited by the laboratory and analyzed following the same analytical protocol as the soil samples. These samples were submitted to Superior Precision Analytical, Inc. in Martinez, CA to be analyzed for Copper, Lead, Arsenic, Zinc and Total Petroleum Hydrocarbons. Copies of the laboratory reports are attached to this report.

Table 1 presents these data in summary form.

TABLE 1

ANALYATE	E-1	E-2	E-4	S-1	RW
COPPER	18	16	16	27	15
LEAD	ND	ND	7.8	ND	ND
ARSENIC	2.5	4.4	ND	4.1	ND
ZINC	45	27	29	120	260
TPH	ND	ND	ND	ND	ND

All results reported in parts per million - mg/kg for soil and mg/l for water.

These data were also supplied to you by separate correspondence.

The standing rainwater was carefully pumped from the excavations into a temporary 20,000 gallon 'FRAC' tank supplied by Reinholdt Construction. This type of tank allows for any solids to settle out prior to discharge. On March 10, 1995, following guidance and approval by the City of Berkeley, the approximately 8,000 gallons of rainwater was pumped from the 'FRAC' to the storm sewerage system.

Following the guidance that you have provided to FVA/Delicor, it is therefore requested that site closure be granted for this site with no further actions required.

Because of the impending sale of this property FVA/Delicor would appreciate your expeditous review of this request.

If you have questions or require additional information please feel free to call Dr. John Sammons at (415) 892-8005 or me at (408) 646-0668.

Sincerely,

Dennis R. Bates, MPH, REHS
President

CERTIFICATION OF RETURN TO COMPLIANCE

Date: 3/8/2018

Owner/Operator: Melissa MacDonald

Facility Name: Melissa MacDonald Metal Works

Address: 705 A Bancroft Way **Zip Code :** 94710

In the matter of the Violation(s) cited on the Hazardous Materials Inspection and Violation Report (Notice to Comply) and/or the Stormwater Facility Inspection Report issued:

On: 3/8/2018 (Date) **By:** Debbie Andersen (Hazardous Materials Specialist)

List all the violation(s) and correction(s) specified on the Hazardous Materials Inspection and Violation Report (Notice to Comply). Attach additional supporting documentation (e.g. photos, copies of manifests/disposal receipts, or other original paperwork).

Compliance Date:	Violation Code:	Corrective Action: (Identify how the violation was corrected)
April 6 2018		Business is now registered on CERS for Hazardous waste
		Waste lines are collected for proper disposal
		Waste is contained and labeled
		Hazardous gases will be reduced to below threshold by May 7 2018

I have personally examined and am familiar with the information submitted and believe the information is true, accurate and complete. I am authorized to file this certification for the facility. I am aware that there are significant penalties for submitting false information and/or for non-compliance with the violations noted, including the possibility of fines and imprisonment.

Name: Melissa MacDonald Title: Owner

Signature: Melissa MacDonald Date Signed: April 6 2018

Failure to submit this Certification within the time specified on the Hazardous Materials Inspection and Violation Report (Notice to Comply) and the Stormwater Facility Inspection Report Form may result in a re-inspection of the facility, to be charged at an hourly rate and fines up to $25,000 per day of non-compliance (HSC Sections 25188 & 25514 and BMC Section 17.20.160).

Inspections completed on this date at this facility

Inspection Number	Inspection Type	Record ID	Program
DAMQ3PKY7	PERMIT SCREEN	PR0002563	HMBP

An inspection of your facility revealed the following violations of the California Health and Safety Code, the California Code of Regulations, and/or Title 15 of the Berkeley Municipal Code. The facility is subject to re-inspection at any time. A re-inspection fee may be assessed.

Summary of Violations and Notice to Comply

HMBP

Violation Observed: H334 CLASS II VIOLATION Comply by 11/26/2016

Failed to adequately establish and implement a Hazardous Materials Business Plan (HMBP) when storing and/or handling a hazardous material in reportable quantities. 19 CCR 4 2729.1, 2731, 2732; HSC 6.95 25507 HSC 6.95 25507

Observation and Corrective Action:

Facility failed to establish required Hazardous Materials Business Plan(HMBP). The facility exceed the specified thresholds of hazardous materials required to submit a HMBP in accordance with BMC 15.12.050. Therefore the facility meet the requirement to report Hazardous Materials and submit a HMBP.

Corrective Action: Please submit required Hazardous Materials Business Plan (HMBP). To create an account please go to cers.calepa.ca.gov.

General Comments and Observations

HMBP

Conducted screening for Hazardous Materials and Hazardous Waste. If the facility store or handle Hazardous Materials and Hazardous Waste in combined quantities in amount >= 55 gal for liquids, 500 lbs for solids, 200 cubic ft compressed gas must submit a Hazardous Materials Business plan (HMBP).

Observed gallons of paints outside/parking lot of Universe Painting Construction (See Photo Attached). The facility claims that they use the state program "Paint Care" to recycle their paints. However the facility do handle hazardous materials and hazardous waste, therefore the facility is required to submit a HMBP.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive local inventory reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	● Yes

Unified Program Local Reporting Requirements for *Berkeley City Toxics Management Division*

Regulated facilities in this jurisdiction are required to:
1) Report all hazardous materials and hazardous wastes if at any time during a year the combined total exceeds 500 pounds or more of all solid hazardous materials and wastes; 55 gallons or more of all liquid hazardous materials and wastes; or 200 cubic feet or more at standard temperature and pressure of all gaseous hazardous materials. Materials in consumer packaging located in a retail area for direct sale to the public need not be included (BMC 15.12.050(A)).
2) Report any quantity of hazardous waste (BMC 15.12.050(C)(4)).
3) Report any quantity of a material that is or contains a material subject to regulation by the Nuclear Regulatory Commission in Title 10 of the Code of Federal Regulations, including any by-product, licensed, source, or special material (BMC 15.12.050(C)(2)).
4) Report all manufactured nanoparticles, defined as a particle with one axis less than 100 nanometers in length. Please submit the information requested in the Manufactured Nanoscale Materials Health & Safety Disclosure Guidelines, provided here: http://www.cityofberkeley.info/uploadedFiles/Planning_and_Development/Level_3_-_Toxics/Nanoscale%20Reporting%20Guidelines%202011.pdf, in a separate report to TMD by March 1, annually (BMC 15.12.050(C)(7)).
5) Report any quantity of an etiologic agent, as defined in subsection D of Section 15.08.060 of the Berkeley Municipal Code Title 15. Please fill out the information electronically by logging in to the City of Berkeley's web portal at http://www.berkeleycupa.com/. Or you may email or mail the required etiologic agent information to Toxics Management Division. For more information, please see the Etiologic Agent Reporting Guidelines at http://www.cityofberkeley.info/uploadedFiles/Planning_and_Development/Level_3_-_Toxics/Etiologic%20for%20portal.pdf (BMC 15.12.050(C)(3)).

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	● No

Hazardous Waste

Does your Facility...

Does your facility generate Hazardous Waste? **If yes**, provide an EPA Identification Number (EPA ID).	● No
Does your facility treat hazardous waste on-site?	● No
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule or Conditional Authorization)?	● No
Does your facility consolidate hazardous waste generated at a remote site? **If yes**, provide an EPA Identification Number (EPA ID).	● No
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	● No
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of RCRA (federally-regulated) hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste. Do not check this if you only generate non-RCRA waste. **If yes**, provide an EPA Identification Number (EPA ID), file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.	● No

DAJI2JOJW	ROUTINE INSPECTION	PRCOGEONG	HAZ WASTE GENERATOR
DAZLXA085	ROUTINE INSPECTION	PR0002563	HMBP

Summary of Violations and Notice to Comply

No violations observed on date of inspection.

General Comments and Observations

HAZ WASTE GENERATOR

Facility uses Paint Care for the removal of the waste paint. They provide storage containers and spill equipment. Disposal records maintained.

HMBP

Updated the inventory to reflect the hazardous waste amount on the hazardous waste inventory item.

DRAFT

The City of Berkeley Toxics Management Division, a Certified Unified Program Agency (CUPA), appreciates your efforts to comply with the CUPA and Stormwater laws and regulations.
